

### Climex Hygrometer P120

The Climex Hygrometer 120 is a compact instrument, designed to monitor relative humidity and temperature, to allow projects to manage sites with critical parameters.

The immediate readings are shown on the display screen, but the unit also automatically logs the data every 10 minutes. Simply plugging the unit directly into a computer will allow you to access automatically-generated PDF graphs which visually show the recorded relative humidity and temperature.

Battery powered, and supplied with a handy wall-plate, the Hygrometer is almost maintenance free. The data-logging frequency can be altered on request.

#### Features & Benefits

- ✓ Measures RH and Temperature
- ✓ Records data in simple graph format
- ✓ Data logging every 10 minutes
- ✓ Battery powered
- ✓ Compact and easy to use

#### Key Applications

- ✓ For humidity and temperature management

# CLIMEX®

## Climex Hygrometer P120

Technical Specification	
Humidity range	5 – 95%
Temperature range	-12 to 70 C
Accuracies:	
Temperature (0 – 30 C)	+/- 0.5 C
RH (15 – 25 C)	+/- 2% RH
Battery	CR2450 (Button Battery)
Battery life	500 days
Data logging period	10m intervals
Computer connection	USB A male input
Length (with wall-plate)	16 (25) mm
Width (with wall-plate)	43 (120) mm
Height (with wall-plate)	110 (220) mm
Weight	53 g
Compliant with EU Directives	2011/65/EU RoHS II 2012/19/EU WEEE 2004/108/EC EMC 2006/95/EC
