

Dustex Quick Props

Zipwall®, a unique temporary screening system, can be installed in minutes by just one person without the need for using tape, nails or ladders.

This makes it the ideal solution to control and prevent airborne dust produced during refurbishment works from contaminating the surrounding environment.

According to health and safety research, dust inhalation on construction sites affects many thousands of workers throughout the UK every year. The side effects of dust inhalation can not only cause sickness but can be fatal. Dust from internal refurbishment programmes particularly in occupied areas or live store environments also causes disruption and can damage your reputation through a poorly presented site, not to mention the time and cost of clean-up.

Features & Benefits

- ✓ Quick and easy to install, no training needed; a 10m screen can be erected in less than 5 minutes.
- ✓ Create exactly the length, height and shape of screen required.
- ✓ Perfect for suspended ceilings, can also be used on angled or vaulted ceilings due to adjustable head.
- ✓ Can be used time and time again
- ✓ Rubber non-stick floor and ceiling contact points ensure stability and reduce risk of marking.
- ✓ Tight-Seal™ accessories mean no need for taping screen edges.
- ✓ Re-sealable Zipwall® door system gives easy access to working area.
- ✓ Gives a professional appearance to any project.
- ✓ Easily stored and transported in hard wearing Zipwall® carry bag.

DUSTEX®

DusteDustex Quick Props

Key Applications

DUSTEX®

Tight-Seal Foam

The Tight-Seal Foam rail and side clamp system enables you to create extra tight dust seals without using tape.

Key Product Features

- ✔ Soft Foam Rail creates a completely dust tight seal.
- ✔ Quick and easy to use, fixes to existing Prophead.
- ✔ 1.5 metre length seals a large area rapidly.
- ✔ Can be cut or overlapped to meet exact screen size.
- ✔ Spring-loaded side clamp creates dust tight seal.
- ✔ No need for ladders, tape or nails.
- ✔ Re-usable time and time again.

1.5m Tight-Seal Soft Foam Rail

Tight-Seal Side Clamp securely fixes Foam Rail to the wall

Caution Tape Reel

The Caution Tape Reel accessory pack enables you to set up a neat barrier quickly without the need to tie caution tape to chairs, doorknobs or heavy stanchions.

Key Product Features

- ✔ Professional looking. The tape stays straight and upright.
- ✔ Tape can be rewound and used time and time again.
- ✔ Can be used on the pole with or without plastic sheeting.
- ✔ Reel holds caution tape rolls of all sizes up to 300m.

DUSTEX®

Door System

The Zipwall® Door System allows you to create a resealable zipped entrance doorway to enclosures whilst ensuring the spread of dust is prevented.

Key Product Features

- ✓ Self-adhesive zip system adheres directly to screening material.
- ✓ Heavy duty two-sided zip allows access and locking from both sides of the screen.
- ✓ Create a door space to any size.
- ✓ Can be used with any type of screening material.
- ✓ Kit comes with unique safe to use Zipper knife.
- ✓ Comes complete with tie backs for secure opening during use.
- ✓ Quick and simple to install.

Self-adhesive zippers easily adhere to the screening material.

Using the unique Zipwall Knife™ to double cut the screening material for a jam free opening.

The doorway can be made to any size.

With the zippers undone the doorway can be rolled up and secured with the ties provided
