

Dustex Quick Props

The Dustex temporary screening system can easily be installed in minutes by just one person without the need for using tape, nails or screws.

Made from aluminium, the quick props are both strong and lightweight, and can extend from 1.7 meters to 3 meters. With their swivel head and foot design the prop is able to be used in all types of floors and ceilings irrespective if level or not. The rubber non-stick contact points ensure stability and reduce the risk of damage or marking. The 4m polythene screening material is tough, reinforced, heavy duty, puncture and tear resistant and flame retardant.

RVT have a number of quick props in stock available for hire, just let us know how many you require. The polythene sheeting is a sale only item.

This system is ideal for containing refurbishment works and preventing dust and fumes from migrating into adjacent "live environments".

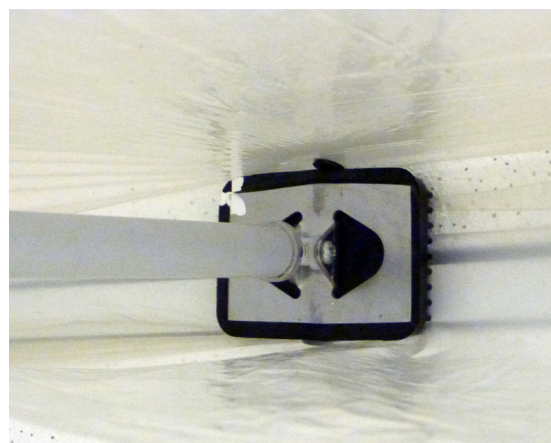

Features & Benefits

- ✓ Quick and easy to install, no training needed; a 10m screen can be erected in less than 5 minutes.
- ✓ Create exactly the length, height and shape of screen required. Perfect for suspended ceilings, can also be used on angled or vaulted ceilings due to adjustable head.
- ✓ Rubber non-stick floor and ceiling contact points ensure stability and reduce risk of marking.
- ✓ Gives a professional appearance to any project.
- ✓ Easily stored and transported in hard wearing Zipwall® carry bag.
