

Ventex Axial Fan 1250S-HP

The 1250S-HP is large and extremely powerful Axial fan, designed to move massive volumes of air.

This makes it ideal for forced ventilation or extraction from large areas such as warehouse and enclosures.

It is also well suited to provide ventilation of road and rail tunnels where there is space to position the fan within or immediately outside the tunnel.

It is designed to suit 1250mm outlet ducting but provides the best airflow with very little or no ducting added.
