

Ventex Twin Axial Fan 300M - HP

Powerful twin motor mobile fan capable of maintaining pressure and extraction capacity through long lengths of ducting.

The contra-rotating blades of these fans enable good pressure development from a 110V 5kva power source. The air jet is very stable making them particularly suited for point cooling.

Features & Benefits

- ✓ Mobile
- ✓ Use with long duct runs

Key Applications

- ✓ Long distance ventilation
- ✓ High pressure extraction through filtration

VENTEX®

Ventex Twin Axial Fan 300M - HP

Technical specifications

| | |
|---------------------------------|----------------|
| Power rating | 2 x 1kW motors |
| Voltage supply | 110V/32A |
| Speed | 3425 rpm |
| Start current | 32A |
| Run current | 18A |
| Noise at 1m | 92 dB |
| Noise at 3m | 87.3dB |
| Airflow | 6000 m³/h |
| Weight | 75kg |
| Outlet & Inlet diameter | 300mm |
| Max. Recommended ducting length | 42m |
