

# UV BEAD INVESTIGATION

Investigate to find out if sunscreen stops UV beads changing colour.

## You'll need

- UV beads
- 2 small clear plastic bags / petri dishes
- Sunscreen

## Instructions

Place about 10 UV beads in each plastic bag.

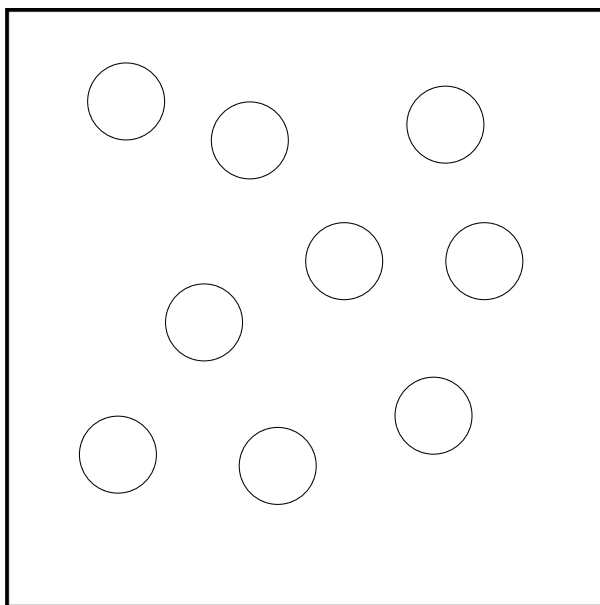

Cover one side of one bag with sunscreen and leave the other bag clean.

Take both bags outside and watch what happens to the beads.

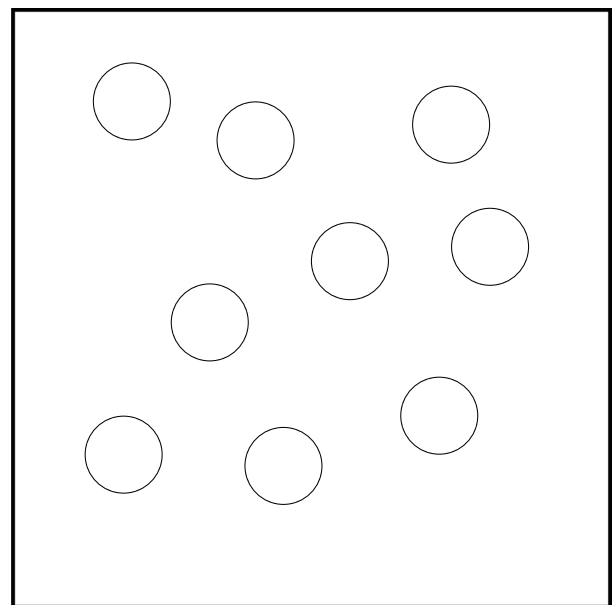

## Results

Sunscreen

No Sunscreen

Did the sunscreen block UV light?

YES

NO
