

IDPs lining up to receive Non-Food Items (NFI) in Akobo County, WVI 2018.

### NEED ANALYSIS

- In 2018, 1.67 million people are still in need of Shelter/NFI assistance. As per the Humanitarian Response Plan (HRP), the cluster will target 1.08 million affected population by the ongoing conflict in South Sudan; 70% of them will be served through in kind distribution while the rest, 30%, will be reached through Cash Based Interventions (CBIs).
- While the frontlines seem to be static, there is still sporadic fighting in pockets across the country, mostly in Upper Nile, Western Bahr el Gazal and Jonglei states. This is creating sustained displacement in some geographical areas and holding back protracted displacement.

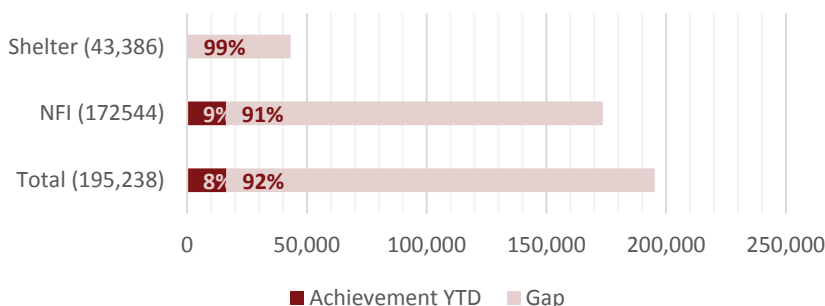

### RESPONSE

- In order to make the response more cost-efficient and sustainable, the HRP 2018 considers a gradual switch toward resilience-based interventions wherever the contextual dynamics allow. Specifically, in those areas where markets exist or can be boosted, CBIs will be encouraged.
- The Shelter/NFI Cluster in South Sudan continues its effort to enhance quality programming. Over the last few months the cluster has focused its efforts in mainstreaming the Accountability to the Affected Population (AAP). A new set of tools have been developed and capacity building has been conducted for all the HRP and non-HRP cluster partners.
- So far, during the first quarter of 2018 cluster partners have reached 16,179 HHs (101,416 individuals) with NFIs and 231 HHs (835 individuals) with shelter assistance. In addition, 34 needs assessments/verifications and 16 distributions were carried out during the same reporting period.
- The core pipeline managed to dispatch 1,039 MT of stock from the central warehouse in Juba to the field locations for response.

### GAPS / CHALLENGES

- Access and security remains the main challenge faced by the humanitarian community in South Sudan. The warring parties limit the access of the humanitarian community hindering the its capacity to provide assistance to the displaced population. Nonetheless, there have been a slight improvement in general access, thus no distribution of survival kits has been reported over the last two quarters.

### KEY DATES

The Shelter-NFI Cluster was activated in 2011 upon South Sudan's independence from Sudan. Since the civil war began in December 2013, the S-NFI Cluster has drastically scaled up to meet shelter and NFI needs that continue to increase.

Activation of cluster: 2011
