Tech Assist

Cadena  
Island City Lab  
Mercy Corps  
Samaritans Purse  
Conversa corps  
Food Fort the Poor

US Department of State  
IOM  
IsraAid  
ShelterBox  
Hazard Management Cayman Islands  
Ger 3

### Meeting Summary

- Jan Willem Wegdam and Alexandra Bates discussed satellite-based data on affected populations, highlighting St. James and Trelawny as the most impacted areas, with a focus on the number of people who lost roofs or whose homes were damaged.
- Alex explained that current data on residential building damage is fragmented and Copernicus coverage is incomplete, but more communities are being mapped, and updates are expected soon.
- During the meeting a Mentimeter exercise was conducted to identify planned and ongoing activities by parish, aiming to avoid duplication. Results in the table below.
- Jan proposed an area-based response approach, suggesting a focus on affected communities rather than just emergency shelters, to provide more comprehensive support.
- The formation of a technical working group to develop a shelter response plan was announced, inviting specialists from organizations to help create a coordinated approach.
- Jan stressed the importance of coordinating activities with agencies in each parish, promoting the use of the OCHA contact list, and maintaining regular shelter sector working group meetings to ensure an effective and collaborative response.

## SHELTER WORKING GROUP ACTIVITIES - JAMAICA

	WESTMORELAND	HANOVER	SAINT JAMES	TREWLANY	SAINT ELIZABETH	SAINT ANN	MANCHESTER
ISRAAID	Protection/ MHPSS		Protection/ MHPSS/ Wash/ Soft Wash
