#### 1. UPDATE ON PLANS FOR THE RECUPERATION OF COCONUTS LUMBER

---

- Briefing on the meetings between DSWD, PCA, Early Recovery Cluster and Shelter Cluster .

Pre-agreement between PCA, UNDP and Shelter Cluster on a single programme for Capiz: 2 Mobile saw mills from UNDP expected. 1 likely to operate from small coconut farmers' cooperative. Coconuts lumber likely to be available for free or at a very reduced price to the Shelter Cluster members in March.

IOM – also hiring/bringing in mobile mills for Region VI. There is a need to coordinate or integrate their initiative with the existing programme.

#### 2. INCIDENTS

---

Implications of geographical prioritization, based on total number of houses affected as opposed to percentage of houses affected.

- DSWD Geographical prioritization is based on total number of affected HH, which tends to neglect rural areas as opposed to urban centres. Municipalities tend to use the same criteria to prioritize needs in their barangays
- WHH bases their distributions on total number of destroyed houses (not % of affected HH's)
- IOM includes proportion of affected houses as part of their criteria to geographically prioritize distributions, comparing population of Barangays v's damages.

Developing situation at Estancia

- Incidents in Pa-On – people upset because Barangay captain accused of favouritism – according to MSWD.
- Actions to be taken
  1. SHELTER CLUSTER: Inform UNDSS
  2. Shelter Cluster PARTNERS: Report incidents to the Shelter Cluster in order to be able to track trends.
