Shelter Activities

80,056 houses damaged in the Provinces of Eastern Samar and Samar (DROMIC damage data)
107,617 households reached with emergency shelter solutions (tarps or tents and NFIs)
34,308 households reached with support for self recovery of shelter
 Of which: **33,437** with roofing materials
871 with transitional or core shelter
0 with cash sufficient to allow purchase of roofing (>10,000PHP per HH)

Current status in Eastern Samar and Samar

Enormous progress has been made to address the immediate shelter needs of the affected population. Despite these achievements the Shelter Cluster is very concerned by the imminent start of this year's Typhoon season and the deadly threat it poses to the population. Thousands of households still require support for self recovery of shelter. In addition, hundreds of families in evacuation centres and no build zones (NBZ) still require shelter options. For details of the Shelter situation in the Provinces of Eastern Samar and Samar contact: bmellicker@iom.int

Notes on the data

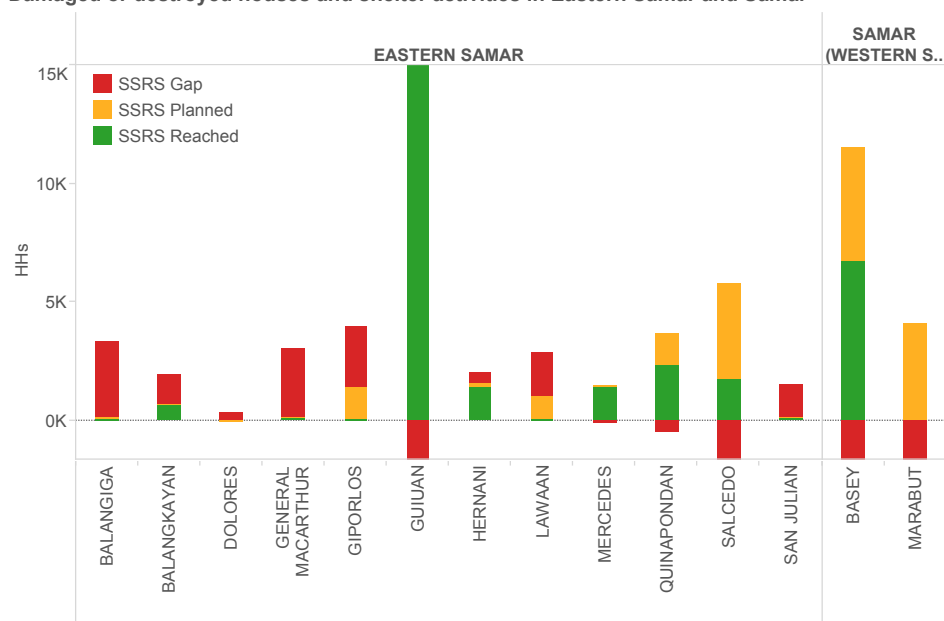

What is known

The data presented in this dashboard is only the data reported to the Shelter Cluster by agencies. The efforts of local government and many small local NGO's are not captured thus far. The Shelter Cluster encourages all agencies working in the shelter response to report their activities to reporting.phil@sheltercluster.org

Validity of data

The population is a 2013 projection based on the 2010 census. The number of houses damaged is based on the DSWD DROMIC data which was last updated 18 December 2013. The damage is a rapid estimate of damage which should be taken as an indication. Partners are advised to do a local assessment of damage. If there is a mismatch, please inform the Shelter Cluster through reporting.phil@sheltercluster.org.
