

Shelter Cluster Dashboard - Region VI (26/05/2014)

Gaps in targeting of emergency shelter

Provinces are sorted on estimated damage density. The top bar chart shows the total number of households targeted for emergency shelter versus the number of households reached and planned.

Gaps in targeting of support to self recovery shelter

The top bar chart shows the total number of households targeted for support to self recovery versus the number of households reached and planned.

Agency activities in emergency shelter and support to self recovery

The table below shows the total households reached per activity for each agency

Agency	Emergency Shelter		Support to self recovery of shelter													
	Total HH with Emergency Shelter Solution		HH provided with roofing materials		Provision of other materials		HH with transitional or core shelters		ToolKit (HH with access to toolkits)		Training of capenters (number trained)		Cash (over 10,000 PHP per HH)		Cash (under 10,000 PHP per HH)	
	Planned	Reached	Planned	Reached	Planned	Reached	Planned	Reached	Planned	Reached	Planned	Reached	Planned	Reached	Planned	Reached
ADRA	950		950						950		530		4,000		850

Key facts

- 482,349** households are affected
- 27%** of affected households reached with emergency shelter support
- 4%** of affected households receiving support to self recovery of shelter
- 33** agencies share their activities through the shelter cluster

Current status in Region VI

Acute shelter needs have largely been addressed as a result of significant distribution of emergency shelter material in the past months. However shelter conditions remain precarious for hundreds of families. In several instances, emergency shelters are barely adequate to withstand current weather conditions and families require more sustainable solutions. A significant capacity gap is affecting shelter self-recovery and reconstruction.

Notes on the data

What is known

The data presented in this dashboard is only the data reported to the Shelter Cluster by agencies. In general almost all agencies are reporting to the Shelter Cluster. The efforts of local government and many small local NGO's are not captured thus far. The Shelter Cluster motivates all agencies working in the shelter response to report their activities to reporting.phil@sheltercluster.org

Needs data

Due to a lack of consolidated household needs data, the needs are currently presented as damage density. The damage density is the number of houses damaged (both partial and total) divided by the total number of houses.

Validity of data

The number of houses damaged is based on the DROMIC data which was last updated 18 december 2013. The number of houses is calculated by using a projection of the population in 2013, divided by the average number of persons per household (4.7). The damage density is just an indication and could be well off if the population or damage data provided by the government is incorrect. Partners are advised to do a local assessment. If there is a mismatch, please inform the Shelter Cluster through reporting.phil@sheltercluster.org..

Gap table for emergency shelter and support to self recovery

The gap table is sorted by number of households that have not received support to self recovery.

PROVINCE STD	Estimated percentage of houses damaged	Total planned and reached Emergency Shelter	Gap Emergency Shelter (# of households)	Total planned and reached for Support to Self Recovery	Gap for Support to Self Recovery (# of households)
ILOILO	32%	34%	104,661	10%	141,027
CAPIZ	83%	36%	83,655	11%	116,586
AKLAN	70%	22%	65,588	12%	73,995
NEGROS ..	10%	4%	60,818	3%	61,476
ANTIQUE	39%	22%	36,725	4%	44,967
