The boundaries and names shown and the designations used on maps do not imply official endorsement or acceptance by the United Nations.
Creation date: June 2018

Highlights

1. Since January 2018, more than 75,000 people were affected by natural events: mostly floods, landslides and intense winds, due to the rainy season. The most affected areas are Ngozi and Rutana due to field destruction.
2. The most urgent needs detected during the multi-sector evaluations were: emergency shelters and rental support, non-food item (NFI) kits, WASH and food.
3. Long-term needs detected: durable shelter solutions, seeds and agricultural support. A Disaster Risk Reduction (DRR) strategy is highly recommended for the main flooded areas.

Sector strategy and objectives

Phase of the Emergency Response	Status of the Emergency Response
Emergency Response → The emergency assistance was focused on the most vulnerable people affected by natural disasters, whose houses were completely destroyed.	→ Completed in the three main provinces: Bujumbura Rural and Mairie, and Makamba, by the combination of efforts of the Shelter Sector partners.
Recovery and Reconstruction → Long-term support for those whose house was partially destroyed or are under an emergency solution. Need to find durable solutions within 3 months.	→ Ongoing. Partially achieved. Rental Support Grants and Durable shelters in Bujumbura Mairie and Makamba, by IOM.
Preparedness and Mitigation → Disaster Risk Reduction (DRR) activities and advocacy, for prevention and mitigation of the risk in areas prone to flooding.	→ Ongoing. DRR project from OXFAM in Makamba, CwC activities in Bujumbura Mairie, Bujumbura Rural and Makamba by IOM.

Context

On 27 April, the IOM's Displacement Tracking Matrix (DTM)* team raised an alert response about flash floods in Bujumbura Rural region of Gatumba following heavy rainfall in the area. Gatumba region is prone to flooding mainly due to overflows from River Rusizi.

On 2 May, a new alert was raised in the southeastern area of the country, in the province of Nyaza-Lac, as the overflow of Lake Tanganyika greatly affected the vulnerable houses built along the coast.

Key Dates

Emergency events:

- April 2018: Bujumbura Mairie and Bujumbura Rural
- May 2018: Makamba

Activation of Sector: March 2015

Deployment of Rapid Response Teams (RRT) and Multi-Sector evaluation:

- April '18 RRT: Bujumbura Mairie
- May '18 RRT: Bujumbura Rural and Makamba
- May '18 Multi-Sector: Bujumbura Mairie
- July '18 RRT: Makamba
- Weekly Follow-up and monitoring

Snapshot

more than **4,900** Households in need
 more than **22,900** People in need
6 Partners participating in the response

Challenges of the response

1. Resources limited during the emergency response.
2. The Recovery Phase is underfunded, the Shelter Sector is unable to respond to the mid and long-term shelter/NFI needs of the affected population.
3. Sector stock emptied. Insufficient resources to respond to future emergencies.
4. Recurrent emergency. Every 6 months the Rusizi river and Tanganyika Lake overflow.
