

Shelter Cluster Vanuatu – TC HAROLD SITREP 11

12th June 2020

1. Map

The map represents the Needs, Distributions and Gaps represented in the table in section 4.

2. Overview of coordination and Shelter Cluster Response

Listed below is the overall summary (based on current available information):

- **9,230 HH** have received Shelter assistance as reported by Shelter Cluster Agencies (In the 3Ws) and by Sanma PEOC. This is based on the Households that have benefitted from Coconut thatch training and the distribution of Tarpaulins and shelter toolkits based on needs, and supported with the distribution of emergency shelter and essential household items (Kitchen sets, Blankets, Sleeping mats & Solar Lamps)
- **5,520 HH** would benefit from the overall committed stocks in the country and in the pipeline by Shelter Cluster Agencies would meet the shelter needs of an additional.
- A further **3,650 HH** worth of relief items have been consigned to the NDMO from overseas government donations.
- This brings the overall assistance available (completed, ongoing & planned) to **18,400 HH**

The Estimated damage: **21,000HH** (*Please see the table of damage estimates & humanitarian gaps on the next page*)

Estimated Response Gap: c. **2,600 HH**

3. Response highlights

- The ShelterBox stocks to be distributed by CARE Vanuatu have arrived in Vanuatu. This would target the remaining immediate shelter needs in both South Pentecost & North Ambrym.
- Vanuatu Red Cross is in the process of distributing stocks meant to benefit 2000HH in Santo.
- More shelter relief stocks (Tarpaulins and shelter toolkits) are currently being shipped to Vanuatu to be distributed by World Vision in the remaining communities in South Santo Area 1 and South Santo Area 2. This distribution could potentially benefit 500HH.

4. Detailed damage estimates & humanitarian gaps

The table below is a consolidation of data and is based on Provincial Emergency Operations Centre assessments and other estimates based on wind speeds and requests from provincial teams.

To aid in identifying shelter response gaps, please look at the figures that are in the “Gaps” column.

5. Humanitarian gaps and Vanuatu Shelter Cluster advocacy points

- While the level of distributions has increased, so far only around 43% of families whose houses were destroyed or severely damaged have received assistance. There is enough shelter relief stock in-country for around 70% of households in need. There is still an urgent need to ensure relief supplies are distributed quickly and target those in need.
- Urban areas such as Luganville rely on markets and livelihoods from tourism which has been reduced owing to COVID-19. Relief and recovery in urban areas therefore continues to need greater attention from shelter response actors.
