

HIGHLIGHTS

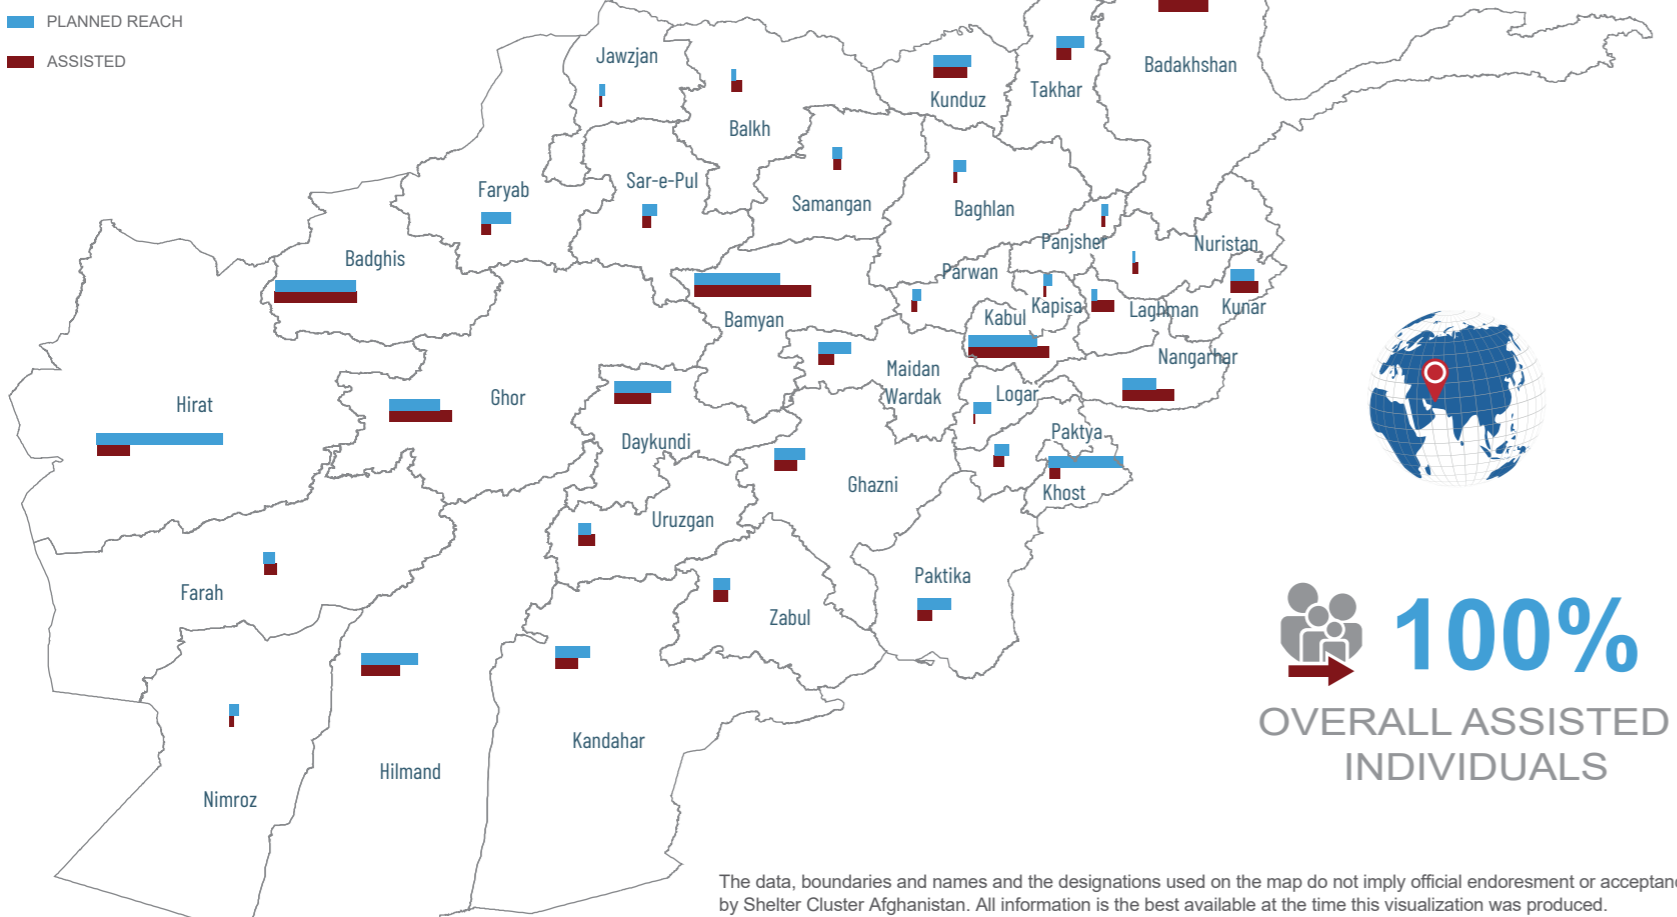

In the Winter season of 2021/2022, ES/NFI Cluster partners reached **728K** people more than the target **725K** with Heating and fuel assistance, winter clothes, blankets, shelter repair and rental support. This response was delivered through **32** partners across all the **34** provinces. Close to **\$29.4** million was received towards the ES/NFI Cluster Joint Winterization Plan 2021-2022 more than the required **\$27** million. While the funding for the humanitarian response and in extension the Joint Winterization plan increased towards the end of 2021, the complexities in the operational context - including service ruptures and the financial system and liquidity crisis - have challenged the humanitarian community to further scale assistance.

ACHIEVEMENTS BY REGION (individuals)
