

Table 2. For apartments in multi-apartment buildings

The table ensures consistency between the List of Humanitarian Repair Works (Category I) and the items of the SIDAR Coordination Platform and the eVidnovlennia program checklist.

The left side of the table contains the list of works developed in accordance with the criteria and quality standards of Humanitarian Repairs of Category I complexity.

The right side of the table contains the names of works in SIDAR and the question numbers corresponding to the eVidnovlennia program checklist.

Approximate description of humanitarian repair works of category I	Unit of measurement	Section of works	Name of repair work (SIDAR / eVidnovlennia)	Unit of measurement (SIDAR)	Question number (SIDAR / eVidnovlennia)
0. Preparatory Works					
Demolition of damaged building elements. Loading and transportation of debris.		Preparation works			
1. Main works					
New PVC windows. Balcony doors. New non-standard PVC windows. Replacement of double-glazed units. Minor window repairs (repair or adjustment of fittings, sealing of cracks and holes). Major window repairs (replacement of fittings and handles). Repair of wooden glazed window frames with replacement of damaged glass. And other related window works.	m2 m2 m2 m2 number of windows number of windows m2	Windows	Replacement of the window unit, taking into account window boards, low tides (in particular, enclosing glass structures of a balcony/ recessed balcony*, or a metal-plastic entrance door block, including thresholds) Replacement of damaged glazing/double-glazed windows (without replacing the window frame or glazing of a balcony/ recessed balcony*)	m2 m2	9 8
External doors	blocks	External doors	Replacement of metal entrance doors	blocks	7
Plastering of external flat surfaces of window and door slopes with painting. Plastering of internal flat surfaces of window and door slopes. Installation of plastic sandwich panel cladding on slopes. Installation of plasterboard and gypsum fiberboard sheathing on slopes. And other related slope works.	m2	Slopes	Restoration of slopes: plastering, sand-free preparation, painting Restoration of windows/doors slopes (plastering, sand-free preparation, painting) Arrangement of facing slopes with plasterboard sheets with glue	m2 sq. meters (only the area with damage is calculated) m2	10 11 30
2. Additional works					
Interior doors	blocks	Interior doors	Replacement of damaged interior doors	blocks	6
Repair of insulated facades. Repair of facade plaster. Minor (non-structural) cracks in the facade walls. Repair of brick wall masonry in specific areas. Repairing the surface of brick walls. Other related facade works.	m2 linear meters m2 m2	External walls/facades	Restoration of damaged facades, taking into account insulation and external decoration (insulation, plastering, painting) Restoration of the damaged decorative layer of stone plaster for the decoration of insulated facades without taking into account insulation Restoration of damaged decorative plastering of facades without taking into account insulation Restoration of damaged painting of facades without taking into account insulation	sq. meters (only the area with damage is calculated) sq. meters (only the area with damage is calculated) m2 m2	12 13 14 15
Repair of partitions on a single-row metal frame. Repair of brick partitions. Plastering walls. Cracks in the walls. Cleaning walls from soot and grime. Other related works on walls and partitions.	m2	Internal walls/partitions	Arrangement of partitions on a single-row metal frame with plasterboard sheathing in one layer with insulation in residential buildings Dismantling damaged brick walls and partitions Masonry of internal brick partitions Removal the damaged plaster of the walls and partitions Plastering of walls and partitions, sand-free preparation for painting/wallpaper Arrangement of wall cladding with plasterboard plates (false walls) on a metal frame	m2 m3 m2 m2 m2 m2	31 20 22 23 24 29
Lighting fixture. Main batch switch, 2- or 3-pole, 25A. Automatic switch (circuit breaker), 2- or 3-pole, 16A. Repair of damage to cables and connections. Installation of electrical sockets. Replacement of switches. Other related electrical installation works.	one point	Electrical equipmen	*Restoration of the damaged part of the utility system in order to restore the functionality of the house/apartment: 5) electricity supply - relocation of damaged sections of electrical communications within the damaged room with the replacement of junction boxes, sockets, switches*	one point	46,5
Water pipe (water supply). Other related works.	one point	Water supply	Restoration of the damaged part of the utility system in order to restore the functionality of the house/apartment: 1) water supply - supply of water pipelines to plumbing fixtures with the removal of water outlets and installation of shut-off taps, flexible connections within one bathroom or kitchen	one point	46,1
Sewage pipes	one point	Wastewater drainage system	Restoration of the damaged part of the utility system in order to restore the functionality of the house/apartment: 2) sewerage - restoration of damaged pipe sections within the house/apartment	one point	46,2
Replacement of heating unit. Replacement and connection of damaged sections of heating pipes. Replacement of heating boilers and connection to heat supply networks and chimney systems. Replacing the circulation pump. Replacement of air ducts with a diameter (chimney). Inspection and cleaning of ventilation and chimney ducts. Other related works.	one point one point pieces pieces lm lm	Heating	Restoration of the damaged part of the utility system in order to restore the functionality of the house/apartment: 3) heating - restoration of damaged pipe sections and replacement of a heater within one room Replacement of a two-circuit gas boiler Inspection and cleaning of ventilation and chimney ducts	one point pieces lm	46,3 57 58
3. Permissible additional works					
Installation of water heaters connected to water supply pipes. Installation of a bathtub tap, pcs. Replacing a toilet (WC) with a directly attached cistern. Replacing the sink together with the mixer tap. Replacing a sink without a mixer tap. Replacement of bathtubs. Replacing a shower tray. Replacing kitchen sinks. Replacing kitchen taps. Other related works.	pieces	Plumbing fixtures	Replacement of a gas water heater Replacement of electric water heaters Replacing faucets with a shower Replacement of a toilet with a directly attached cistern Replacement of the washbasin together with the faucet Replacement of a washbasin without a faucet Replacement of bath tubs Replacing the shower tray Replacement of kitchen sinks Replacement of kitchen faucets	pieces pieces pieces pieces pieces pieces pieces pieces pieces pieces	56 55 52 47 48 49 50 51 53 54
Wall finishing (plastering and painting). Tiles in the bathroom and kitchen. Ceiling finishing (plastering and painting). Other related works.	m2	Finishing works	Restoration of damaged interior wall equipment (painting) Replacement of electric water heaters Restoration of damaged interior wall decoration (wallpaper) Restoration of damaged internal wall equipment (ceramic tiles) Restoration of damaged internal equipment of the ceiling (painting) Restoration of damaged internal equipment of the ceiling (wallpaper)	m2 m2 m2 m2 m2	25 27 28 32 33
Repair of concrete floor base. Repair of floor coverings (ceramic tiles, laminate, parquet, linoleum). Wooden floors. Other related works.	m2	Floors	Dismantling of cement floor coverings Installation of waterproofing Installation of cement screeds up to 60 millimeters thick Arrangement of self-leveling screeds from a cement mixture Restoration of a damaged ceramic tile floor Restoration of a damaged laminate floor Restoration of a damaged parquet floor Restoration of a damaged linoleum floor Replacement of individual boards in the floors (in case of local damage) Restoration of wooden floors Painting of wooden floors	m2 m2 m2 m2 m2 m2 m2 linear meters m2 m2	35 36 37 41 38 39 40 42 43 44 45
Suspended ceiling. Stretch ceiling. Repairing plaster ceilings. Cleaning ceilings from soot and smoke. Other related works.	m2	Ceilings	Restoration of the damaged internal equipment of the ceiling with the arrangement of the frame (plasterboard) Restoration of damaged interior wall equipment (painting)	m2 m2	34 26
Concrete or metal ground ramp for people with disabilities with a sufficient slope of 8% (width: 80–120 cm). Handrails for people with disabilities. Rubber door threshold (80–120 cm). Special toilet for people with disabilities. Special toilet seat for people with disabilities at a height of 45–50 cm. Washbasin for people with disabilities.	pieces	Staircase and adaptations for people with disabilities			
Treatment of mold-affected areas	m2	Antiseptic measures	Two-layer surface antiseptic disinfection: removal and prevention of fungi, moss, algae and other microorganisms on mineral substrates inside and outside the premises	m2	65
