

In-Kind Relief Aid

LogIK Logistics Information about In-Kind Relief Aid

Overview

The humanitarian context in northern Iraq has deteriorated over the past few months and remains uncertain as armed clashes continue to drive displacement. In light of yet another wave of displacement, occurring as Islamic State forces advance on the cities of Heet, Ramadi, and Amiriyat al-Fallujah, security condi-

tions continue to fuel the situation and to limit access to affected populations. As the winter approaches, renewed efforts are required to insure the security and wellbeing of IDPs. The weather is already demonstrating the need to correct the shortcomings of winterisation preparations with rain getting into shelters.
