

Estimate of Disaggregated Population Data by Nagari (Village)

This report provides an estimate of sex and age disaggregated data at the Village (Nagari) level in the Province of Western Sumatra (Sumatera Barat). Population and household figures disaggregated by sex are taken from the Village Potential 2008 (Pendataan Potensi Desa/Kelurahan 2008) published by the Indonesian National Statistical Office (Badan Pusat Statistik). Population figures disaggregated by age are based on SPHERE standards and calculated from Table 4.1.2. of the publication 'Sumatera Barat in Figures 2207-2008' (Sumatera Barat Dalam Angka).

A note on Pcodes: Unique codes can be derived for each District, Sub-District and Village by combining the codes of each parent unit. A complete Province code is 2-digits, a District code is 4-digits, a Sub-District code 7-digits and a Village code 10-digits. For example, the village of Nagari Cingkaring - the first listed in this gazetteer - has a unique village Pcode of 1307061004, made by combining the province code (13), district code (07), sub-district code (06) and village code (004). Similarly, the unique Sub-District code for Banuhanpu is 1307061. Further information on the Pcodes can be obtained from OCHA.
