NOTES

- Districts shaded by ranking of % Households with a Damaged House
- Population data supplied by OCHA, it is recognized to be out of date and in need of projection, however is useful as a relative measure between districts
- Household assumed to be 5 people
- Population density data also outdated, but also useful as a relative measure between districts
- Data acquired from CDMP sitrep, 29 Nov
- An elevated number due to the population data that is out of date, however does give an order of magnitude and gives an indication of severity
- Damage Density - the number of affected houses per square km
- Rankings - the lower the number the higher the priority compared to the list of areas compared

NOTES

- 9 Assumption that 20% of the affected population will be able to rebuild back themselves - to be confirmed and endorsed by cluster
- 10 Assumed number of houses that need to be rebuilt by both government/military and humanitarian resources
- 11 Estimated percentage of the response that will be provided by GoB/Military - to be confirmed by GoB
- 12 Estimated number of houses that need to be rebuilt by the humanitarian community
- 13
- 14
- 15
- 16
