### Influx from Lebanon Emergency

- **Shelter Typology:** Most newcomers, both Lebanese and Syrians, are staying with family or relatives. A smaller number are renting accommodations, and even fewer are accommodated in a 30 dedicated “hosting centers.”
- **Needs:** While the needs of those in hosting centers can be identified, its more challenging to define the needs of the other population groups. The shelter sector, along with other sectors contributing to the SYNAT initiative, which aims to capture, quantify, and map sectoral needs across the country.
- **Resource Mobilization:** Inter-Agency ‘flash appeal’ was launched on the 6<sup>th</sup> of October with a total request of \$60 million for both shelter and NFI over 6 months.

### Coordination

- **2025 HNO/HRP:** The sector has adopted the ‘Delphi Methodology’ and established ‘expert panels’ at the sub-national level. These panels are tasked with revisiting the severity scores and the PiNs of their respective sub-districts and make necessary amendments.
- **SHF 1st Standard Allocation:** 6 projects with shelter component were successfully passed the vetting process and were awarded a total of \$1.5 million. Notably, NGOs contributed significantly to this allocation, reaching a 100% contribution rate.

### Program

- **Official Projects’ Approval:** The official approval from the line authority was received around the end of July. This approval provides the ‘go-ahead’ clearance for more than 200 projects across the country, including both in-kind projects and cash-based projects.

### GAPS / CHALLENGES

- Significant economic decline coupled with price fluctuation has resulted in a decreasing scope and/or target for shelter projects.
- The diminishing coping capacities of both IDPs and host communities, along with limited financial resources of the government and sector partners, are leading to an increase in shelter need.

### KEY FIGURES

Sector Partners (Appealing / Reporting)

**26 / 17**

People in Need / Targeted

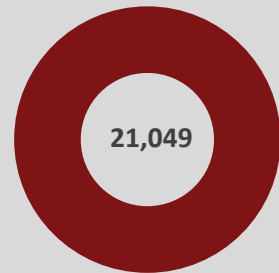

**3.9M / 580K**

Total Reach – 20% of 580K Targeted.

**142,341**

Total Individuals Reached by HH-based Activities

**Note:** The ongoing Technical Damage Assessment for residential building in the three affected governorates is conducted through collaboration between the shelter sector, governorate offices, and engineering syndicates. As of now, the assessment has covered 160,000 people.

**FUNDING REQUIRED: \$108 USD Million**
