Updates of Mogadishu Rains on 16 June 2016

Heavy rain in Mogadishu started Thursday night had strong impact on the movement of people and public transport as most of the streets in the capital turned into pools. The rainfall comes a time when some IDP displaced from floods from Hiran as well as drought and war affected people from lower Shebelle.

Heavy rains caused in some Mogadishu water reserves in Wadajir, warta nabada, Boondhere, Hodan, Hamar jajab districts, to overflow leading to flooding to near IDPs and Vulnerable host community. An estimated 930 people have been affected by the flooding both are IDPs and Host communities, but IDPs are highest affected by the rain, the IDPs are displaced inside Mogadishu and other regions including lower Shebelle, Hiran, Bay, Bakol, while some of drought/flood affected still live with relatives in nearby areas. The IDP Shelters or plastic sheets were floating and latrines were destroyed by the rain, so that sanitation conditions are reportedly very poor and fears situation may worsen, with possibility of high risk to breakout of diarrhoea, malaria, skin diseases and respiratory diseases.

The Mogadishu rain affected 23 internally displaced people's settlements and vulnerable host communities in Mogadishu from different districts include Hodan, Waberi, Daynile, Dharkenley, Hamarwayne, Hamar jajab, Warta Nabada, Boondhee, Yakshid, Karan, Huriwaa and wadajir. An observation conducted by SWDC Field workers to determine number of people affected and lost in above districts.

Figure 1 Destroyed Toilet

The water reserves in Hodan, Wadajir, Waberi, warta Nabada and Bondhere severely affected the vulnerable Community and IDPs near that districts, as 8 children dead - 4 in Camp shabelle in Hodan Tarabun area, 3 in Daynile Mustaqiin camp and 1 in Huriwaa while two old houses fall down in Hamar Wayne and Huriwa but fortunately no one died or was wounds, in addition to that 27 of people obtained minor wounds during the evacuation. One of residents in Huriwa told to SWDC "Our clothes and bedding are all gone, some others are still floating on the water, we tried

to save them but we couldnot”.

women, children and the elderly. Halima is a mother of 3 children who lost one of her children, she told to SWDC *“The non-stop rain yesterday (16/6/2016) started in the middle of the night and washed away my house and I lost one of my children, all night and day I was sitting in open area together with my children and the body of my child”*

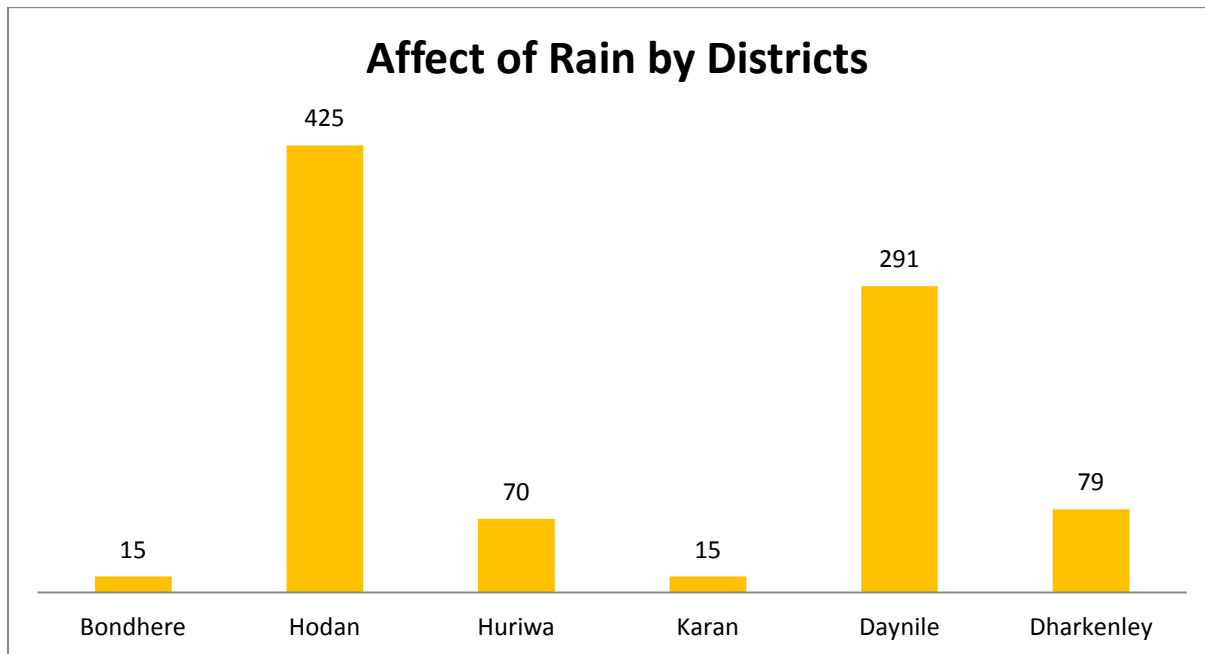

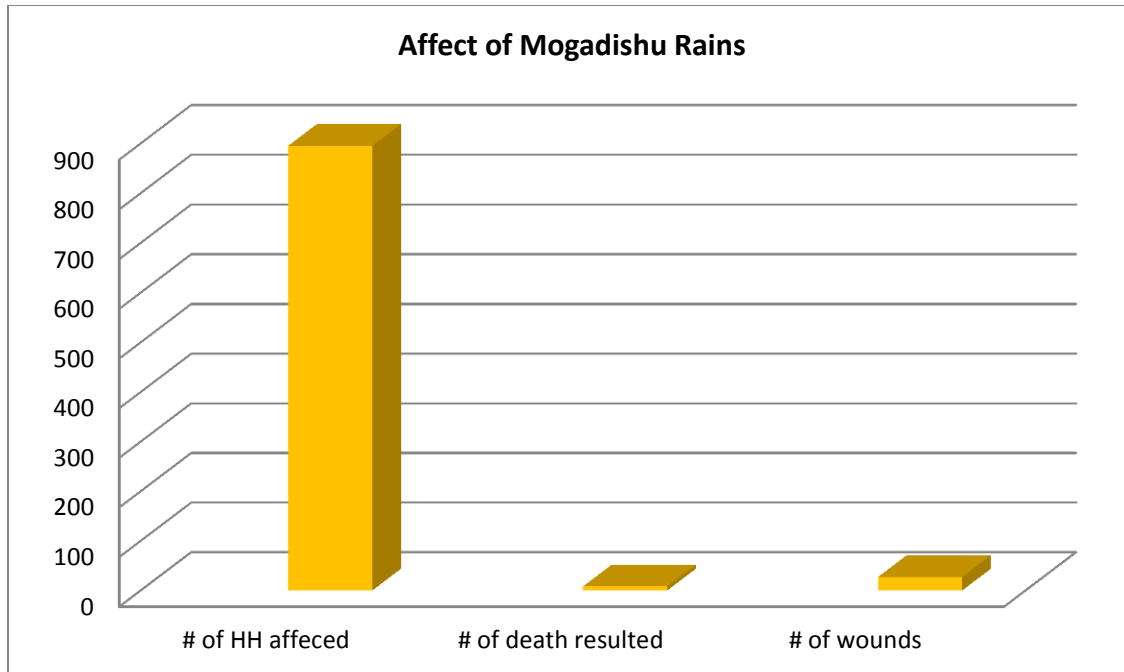

The rain mostly affected

Figure 3 Nafisa's House

Nafisa is a pregnant 35 year old mother, she told SWDC field worker *“My house collapsed and I lost my tents that shifts in the floods, I shouted several times for help but no one responded. I could not stand because I have joint pain disease, but after around six hours the camp focal point found me”*.

The below table and charts shows number of IDPs affected in each districts in Mogadishu:

District	IDP settlement	# of effected HH	# of Death	# of Wounds
Boondhere	Ceel awmuude	15	0	2 children
Hodan	Tarabunka camp shabelle	60	4 Children	3 children and 2 adults
	Xubi	105	0	5 Adults
	Warshada Kabka	215	0	4 children

	(Ex Albaraka)			
	Sigale	45	0	4 Adults
Huriwaa	Dabaqa Dhiiga	70	1 child	2 children
Karan	Behind Mohamud Ahmed Ali School	15	0	0
Daynile	Malable	12	0	3 Adult
	Himilo	13	0	0
	Barwaqo2	3	0	0
	Aladala (IIMAAN)	120	0	2 Adult
	Anfac	6	0	0
	Wamaxan	5	0	0
	Gargaar	13	0	0
	Harwanaag	9	0	0
	Bulsho Kaab	37	0	0
	Gacal	17	0	0
	Seven seven (Alla aamin 2)	11	0	0
	Mustaqim	30	3	0
	Imaan waydow	15	0	0
Dharkenley	Barlin	20	0	0
	Ganey	40	0	0
	XUSNI	19	0	0

The Banadir Administration started on Thursday absorbing water in the main centre of the city by using water tankers specially Hamar jajab in front of Seaport, KM4, but the most right affected areas in IDPs is yet not dealt with and people are still suffering.

Sanitation and Hygiene had also deteriorated in the IDP camps. There were too many people using few latrines and now the rains have destroyed some of the latrines. So that an urgent need for intervention on the sanitation side. Water, sanitation, hygiene, health and shelter have been cited as urgent needs in IDPs mentioned above.
