www.shelterprojects.org

This event will focus on learning from past experiences of shelter and settlement responses in the Asia-Pacific region by actively engaging actors using case studies from the Shelter Projects publication. It will bring together practitioners, academics and other relevant local stakeholders to collectively review case studies from past editions, focusing on “what worked well” and “what didn’t work well” in the past. It will also provide an opportunity to share experiences from recent shelter and settlement responses in the region, which will be reviewed and considered for inclusion in the next edition.
