

Plastic sheeting and rope

Split plastic sheet without cutting

**Find the middle
where there is a join**

**Peel apart to make two thin
plastic sheets**

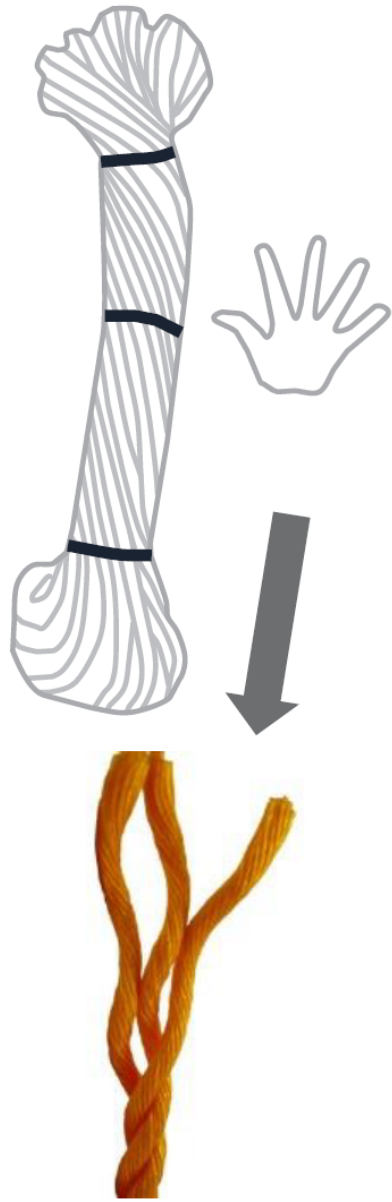

Fixing plastic sheeting with rope

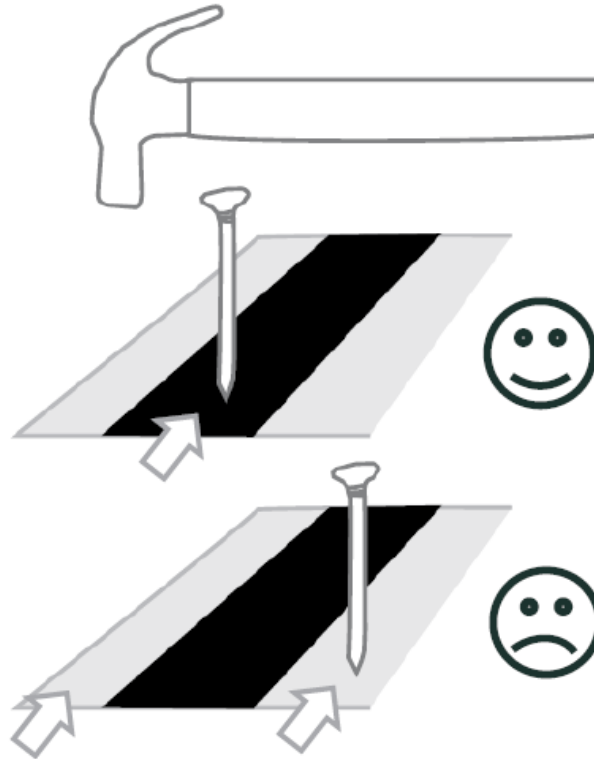

**Do NOT fix through
the white part of
the plastic sheet**

Fix through the strong black part of the plastic sheet.

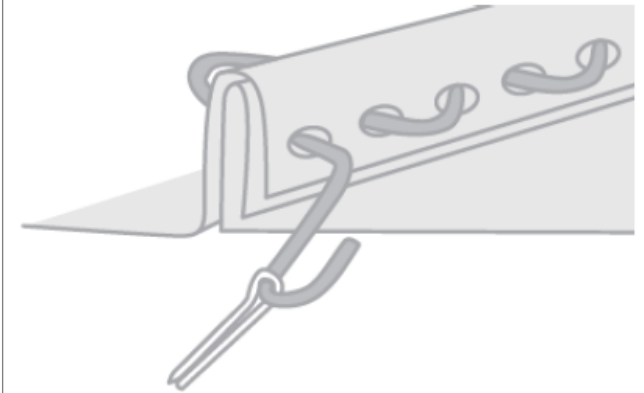

You can use stones or tie a knot.

Unwind the rope to get thinner rope.

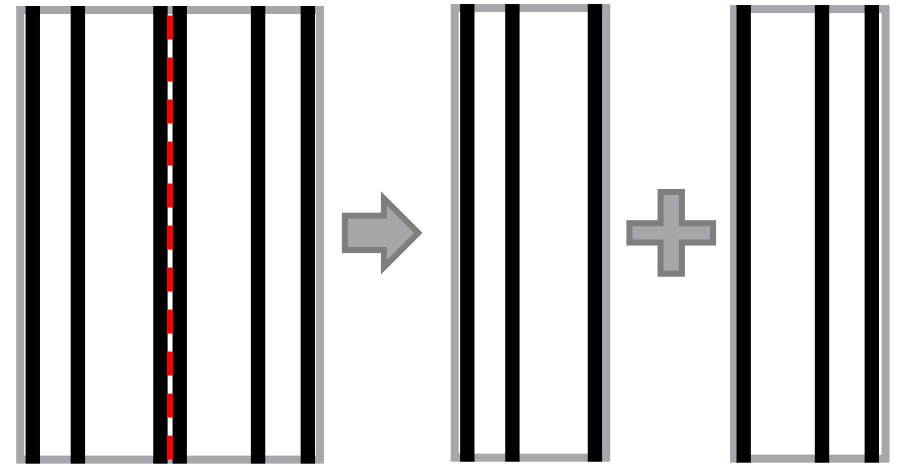

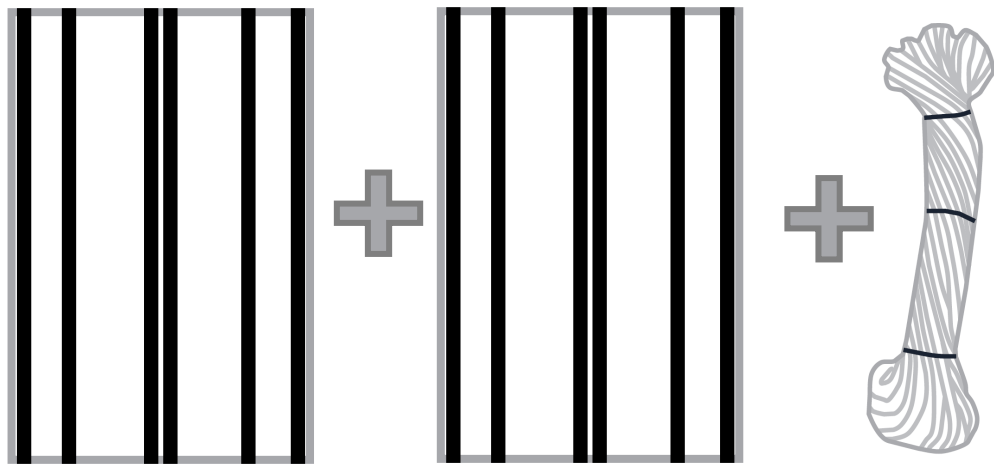

Do NOT put nails in the white part of the plastic sheet

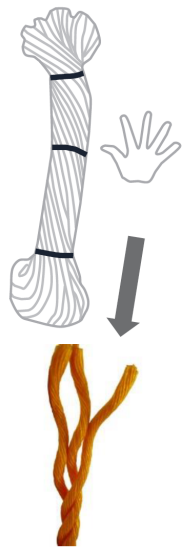

Sew using the holes in the black part of the plastic sheet
