

KEY MESSAGES

Winterization provides **life-saving support** to the most vulnerable individuals, protecting them from harsh weather conditions and preventing mortalities, especially for children and the elderly.

This strategy utilises an **integrated approach** and **enhanced coordination** between clusters to address cross-cutting needs brought on by the harsh winter season.

Early identification of funds will enable partners to plan ahead, procure and preposition winter items. This is crucial in light of possible delays due to COVID-19.

A **timely response** will alleviate the adoption of negative coping mechanisms, lessen occurrence of respiratory infections, U-5 mortalities, hypothermia and in some cases even death especially among elderly, women and children.

AFFECTED POPULATION

4,855,748

people in need of winterisation response.

200,107

households to be reached with the winterisation response.

FUNDING STATUS

USD 49,019,428

GAP

Funding required to assist targeted households in need of winterisation response.

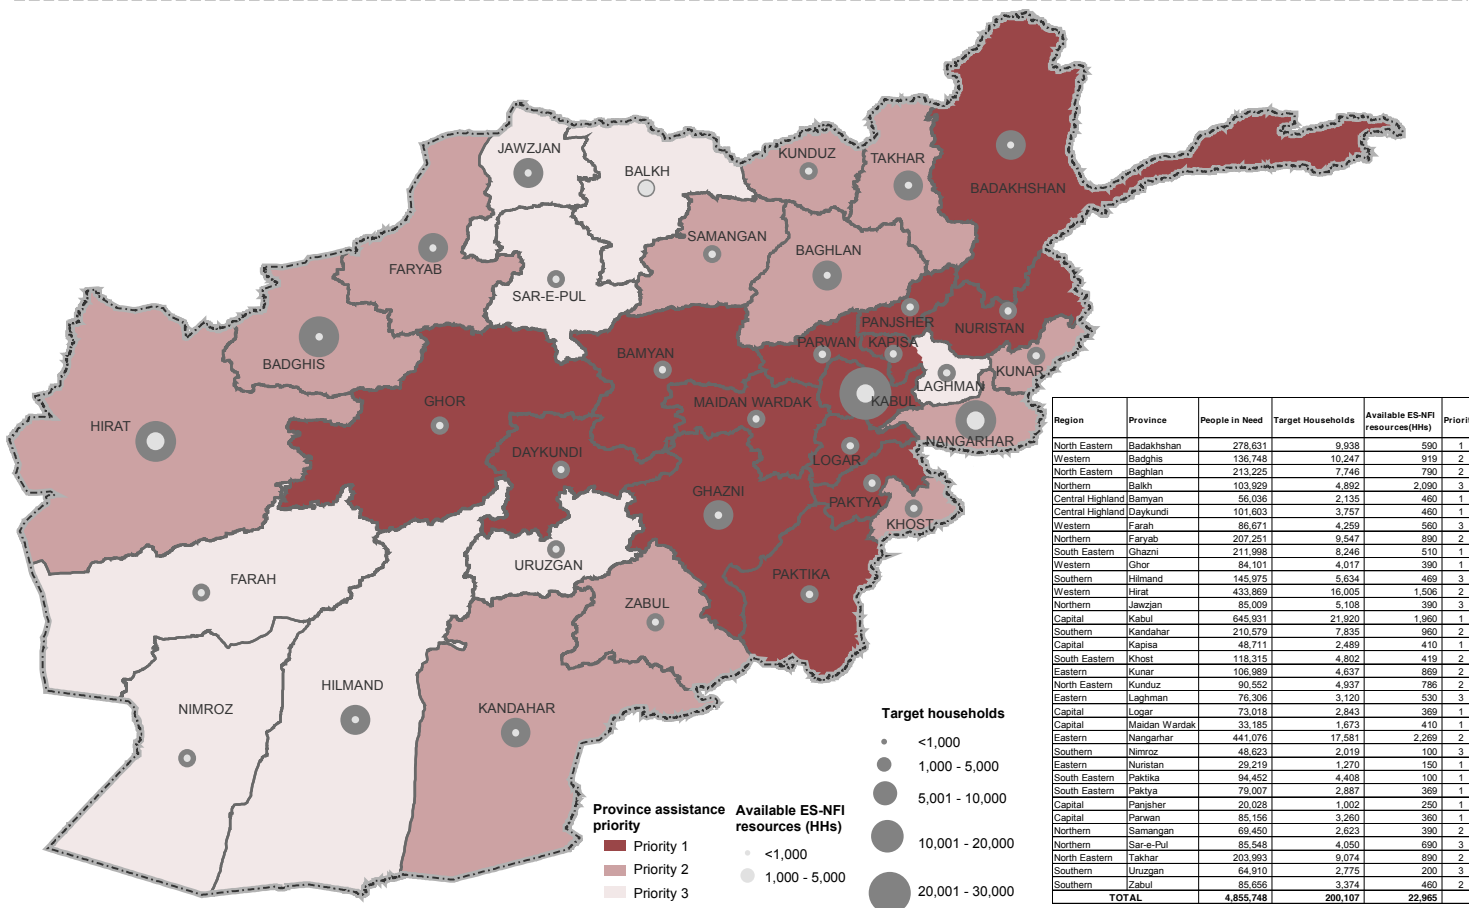

% of available funding

USD 8,559,860 funding available to assist targeted households in need of winteriation response.

RESPONSE ACTIVITIES

Priority activities	Target HHs in need	Capacity available
Blankets	114,061	44,400
Winter clothing kit	86,046	13,862
Heating Fuel	172,092	22,965
Shelter repair	12,006	811
Rental Subsidy (CfR)	6,003	200
