## HIGHLIGHTS

- Cold temperatures of the winter paired with un-successful negotiation of access to settlements in Non-Governmental Area led to significant number of villages not receiving any of four forms of winterisation assistance (heating fuel, shelter insulation, NFIs and cash – [see coverage map](#)). As result, population in NGCA will be exposed to un-dignified and potentially harmful conditions due to lack of heating system, personal items or poorly insulated premises ([see map](#)).
- Structural repairs and reconstruction of core houses are still high demanded in both GCA and NGCA, especially in light of a population living in very poor conditions close to their previous dwellings.
- If on general point of view, assistance in the east is significant, all central and west Ukraine is totally forgotten by shelter assistance due to the particular interest of donors focusing to limited geographical locations. As result, IDPs stranded in displacement in these forgotten regions are receiving a restricted assistance only by the government and/or local organisations and usually do not benefit from international assistance, which increases their exposure to inadequate shelter conditions, evictions and ultimately forced return or secondary displacement.

## KEY DATES

Events in Crimea in March 2014 and rising tensions in east Ukraine from April 2014 resulted in a conflict that has triggered mass displacement within and from Ukraine. In January 2015, Debaltseve crisis took place: massive shelling occurring in the highly urban area of Debaltseve led to influx of some 10,000 IDPs to both GCA and NGCA. Despite Minsk II ceasefire agreement, the security pressure is still not released and recovery not engaged.

Activation of Cluster: December 2014
