Damage Density

- High
- Low

Evacuation line

Governorate boundary

Locality boundary

The map displays the density of damage in northern Gaza based on a rapid analysis of satellite imagery dated October 21st. The map does not include a count of damaged buildings, and further has not been validated by observations on the ground. The density, or heat map, shown is relative to the total number of detected damage points at a single point in time, important to note when comparing damage density from different dates.

0 1000 2000 Meters
