NEEDS ANALYSIS

As per the IOM-led DTM report, **1.44 million IDPs** and **4.46 million Returnees** have been identified across the country, from January 2014 to 31st October 2019.

The number of IDPs continues to decrease (from 2.6 million as of Dec.2017 to 1.44 million as of Oct.2019); while the numbers of returnees has increased (from 3.2 million, end of Dec.2017 to 4.46 million, end of Oct.2019).

- 25% of the 1.44 million IDPs are in camps, while 67% are currently in private settings (in rented accommodation or with host families); 8% remain in critical shelter arrangements (unfinished/abandoned building; school/religious buildings and informal settlements).
- 95% of the returnees are in their habitual residence, 2% in Private Settings while 3% live in critical shelter arrangement such as informal settlements, unfinished and abandoned buildings, schools, religious structures.

CURRENT CLUSTER INTERVENTIONS (1st Jan. – 31st Oct. 2019)

- Out of the overall SNFI Cluster target of 861,650 individuals, **159,984** people have been assisted with **NFI kits**; **72,809 people** have benefited from **shelter interventions**. The coverage for NFI kits stands at **19% of the cluster target**; and the coverage for shelter stands at **8% of the cluster target**. From the total number of beneficiaries reached:
 - 79,526** people living in camps and informal settlements have been reached with NFI kits; **28,496 people** have been provided with emergency shelter interventions.
 - 38,652** returnees have been reached with NFI kits; **40,928 people** were assisted with either emergency repairs of war damaged houses, or provided with sealing-off kits.
 - In October, SNFI Cluster partner UNHCR began providing winter assistance. UNHCR reached 89,480 people with winter assistance in October.

GAPS / Constraints and Key Critical Issues

- A total of 16,636 people left camps for non-camp settings between mid-August and 22 October, according to IOM. More than half of the households contacted since departure reported that the movement was involuntary, and many HHs are now experiencing returns to below-standard conditions and secondary displacement, leaving a large number of HHs without access to adequate shelter as winter commences. SNFI partners are conducting assessments to identify specific needs.
