Key Figures

# of People in need	322,939
# of People targeted	196,745
# of People assisted	140,630

Overview of Needs

As of 19 September 2019, approximately 68,697 households or 322,939 individuals have been affected by the floods across Sudan. Affected households include internally displaced people (IDP), refugees, and host communities who are in need of shelter solutions and life-saving non-food items (NFIs) such as plastic sheeting, plastic mats, jerry cans, blankets and cooking sets. These items help restore a minimal sense of dignity and protection against exposure to the elements, mitigate health risks and provide some privacy and security to those in need.

Overall Response

To date, the Sector has been able to response to the needs of some 28,126 households or 140,630 individuals (44% of need) through 10 Sector partners across 11 of 13 states with NFI needs. Through the NFI Core Pipeline managed by UNHCR, the Sector has responded to the needs of some 8,630 households or 21,211 individuals since the beginning of the flood season in July 2019.

UNHCR has released an additional 10,000 full NFI kits targeting flood affect families in Sennar, White Nile State, Kassala, and North Kordofan. The Rapid Response Fund manged by IOM has also released fund to Sector partners for Shelter and NFI in White Nile State and North Darfur.

Gaps

The current gap for NFI needs stands at 56% of household affected across 13 states, with key gaps in White Nile and Khartoum states. The Sector NFI Core pipeline has allocated additional resources to meet the needs in Khartoum, White Nile, and Red Sea states. In addition to planned responses in the pipeline in West, North and East Darfur, and North Kordofan states.

The Shelter gap remains high, as most affected households have access to emergency materials for temporary shelter couples or are residing in buildings such as schools. Given the near end of the rainy season, shelter solutions for vulnerable IDPs, and host communities are a top priority intervention.

The Rapid Response fund has allocated funds for Shelter and NFI in North Darfur and White Nile states. In addition to START funding for INGOs in White Nile State.

Table 1: SECTOR RESPONSE

State	Household (HH)	Individual	Sector Response (HRP) by 03 September 2019		Supported through the Core NFI Pipeline ¹ 03 September 2019		Additional planned response by 31 September 2019		Total anticipated sector reach by 31 September 2019	
			HH	Est.Ind.	HH	Est.Ind.	HH	Est.Ind.	HH	Est.Ind.
North Darfur	5,839	17,460	2,473	12,365	1,022	5,110	3,366	16,830	5,839	29,195
