

# SUDAN FACT SHEET

July- September 2017

NFIs distribution to vulnerable female-headed households in S.Darfur.

Darfur Displacements 2017 Third Quarter - OCHA

## Need analysis

- During the 3rd quarter of the year, response to newly displaced populations continued, and with increased access to areas in Jebel Marra and South Kordofan state, sector partners were able to conduct assessments to identify ES/NFI needs of populations that had received no assistance for a number of years.
- With more stability observed in many parts of Darfur, the number of returnees also continued to increase, both IDPs and refugees from across the border in Chad.
- The rainy season July- September brought with it heavy winds and flooding in many parts of the country destroying IDP shelters and affecting the host community.
- South Sudanese fleeing from the conflict in their country, continued to arrive in Sudan in large numbers, requiring immediate shelter and NFI assistance.

## Response

During the reporting period, Sector partners responded to the ES/NFI needs of some 11,040 people in various parts of Sudan, mostly Darfur, South and West Kordofan to newly displaced people, most vulnerable protracted IDPs; returning IDP and refugee families and disaster-affected households. ES/NFIs were provided from the NFI Common Pipeline (CP) and from partner stocks.

- A total of 2,461 returnees (mixture of IDP and refugee) were registered and assisted in villages in West Darfur
- A mixed population of IDPs and South Sudanese Refugees was registered in Allait locality, North Darfur. Following assessments/verifications, over 3,000 IDP and refugee families were assisted with basic emergency shelter material and NFIs from the NFI CP and UNHCR CRIs.
- Over 7,900 flood affected people were assisted in North Darfur (Shangil Tobaya) and South Darfur (Kalma) IDP camps.

## Gaps / challenges

Lack of funding for the NFI Common Pipeline and for the construction of transitional shelters was the main obstacle to achievement of set goals.

## Coverage against targets (HHs)

Shelter and NFI items delivered (July- September 2017)	
NFIs (blankets, sleeping mats, jerry cans, kitchen sets) delivered	11,040
No of beneficiaries assisted	55,200
No of plastic sheets (ES) delivered	27,555
No of HHs received ES assembly material material(bamboo sticks/ rope)	1260
No of HHs received Transitional shelters	242

## CLUSTER TEAM
