

Dear Health Care Professional:

Mother's milk is the preferred food for infants. If infant formula becomes necessary, only certain formulas are available through the WIC Program. The Kansas WIC Program provides Similac Advance or Gerber Good Start Soy formula for healthy infants from birth through twelve months of age whose mothers choose not to breastfeed or who partially breastfeed. A contract for these formulas provides a special price that will help the WIC Program serve more women, infants and children in Kansas. Similac Sensitive for Fussiness and Gas, Similac for Spit Up, and Similac Total Comfort may also be provided with a ***documented medical diagnosis***. Infants will not be issued any other brands of standard milk-based, including lactose free and rice starch added milk-based, or soy-based infant formulas.

The WIC Program will provide other formulas or WIC-eligible nutritionals to WIC clients if there is a ***documented medical diagnosis*** for which the formula is intended. The WIC Program will not issue any formulas or WIC-eligible nutritionals simply to enhance nutrient intake or manage body weight without an underlying medical condition.

If an infant, child, or a pregnant, breastfeeding or postpartum woman in your care requires , Similac Sensitive for Fussiness and Gas, Similac for Spit Up, Similac Total Comfort, or a special formula, complete and sign the form on the reverse side of this letter. The request for a special formula must be renewed each WIC certification period. Infants are usually certified until their first birthday. Certification periods for children are generally 12 months. A new form is required anytime the special formula is changed.

Thank you for your cooperation and interest in good nutrition. Please call your local WIC clinic, if you would like further information on requesting special formulas

**KANSAS WIC SPECIAL ISSUANCE AUTHORIZATION
For Infants and Children**

Client Name	Date of Birth	Parent/Guardian Name
