# Vice-President's policy theme – Ethical, responsible and secure use of technologies and data

How do we understand and promote the ethical, responsible and secure use of technologies?

This includes the data generated and stored and the public service designs, processes and interactions they enable. It also extends to the outcomes they generate. All this while ensuring public benefit and minimising unintended consequences.

In practical terms, what do we mean by ethics and how do we apply them?

# Vice-President's policy theme – key areas

**Champion** the ethical use of technologies and data so that they do good not harm, are used fairly and operate transparently.

**Promote** the five traits of responsible use of technology and data: technical knowledge, social responsibility, foundation of trust, ethical deliberation and leadership commitment.

**Align**, in partnership with the Cyber Technical Advisory Group (C-TAG), local public sector technology and data security with the wider aims and objectives of the National Cyber Security Strategy and Secure Connected Places programme.

**Advocate** the wider adoption and application of ethical and security practices in accordance with the Seven Principles of Public Life: selflessness, integrity, objectivity, accountability, openness, honesty and leadership, and the Local Public Service Senior Managers: Code of Ethics.

**Mark Lumley, Vice-President**

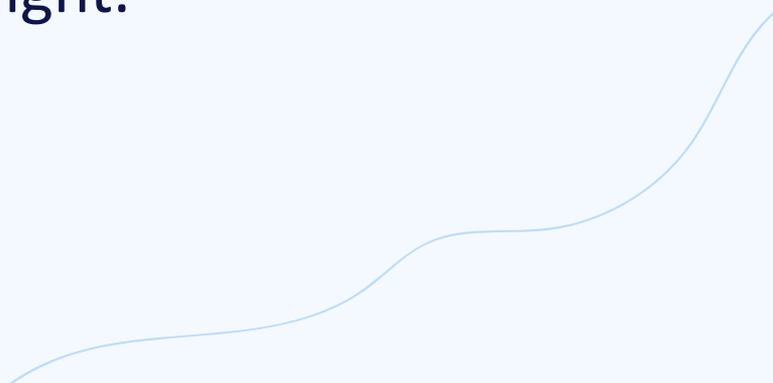

**Policy theme:** Ethical, responsible and secure use of technologies and data

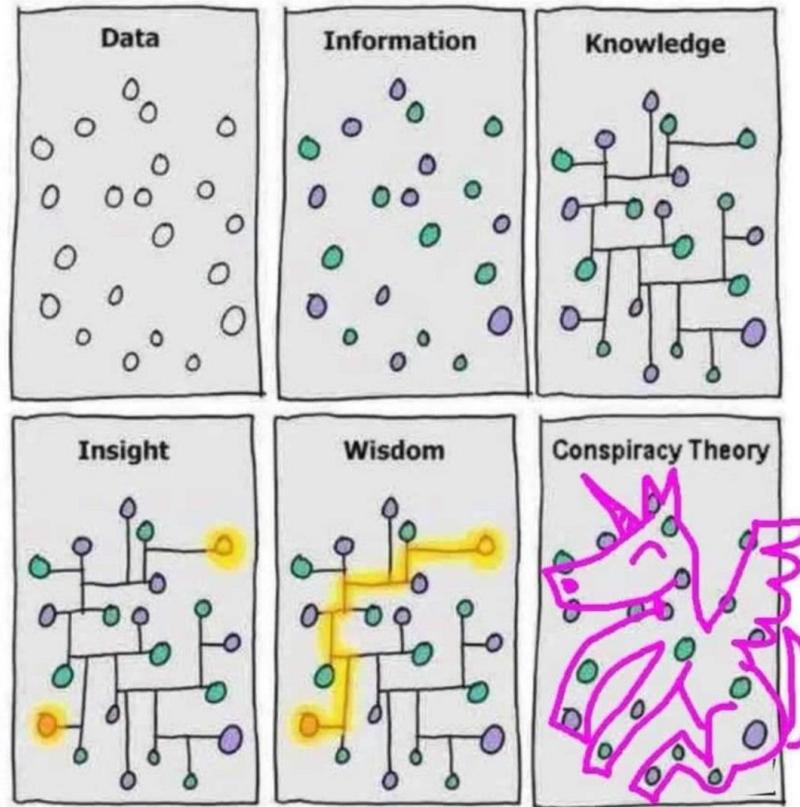

## **Local government:**

A crisis is not a time to throw #ethics out of the window – it is a time to do things fast and do them right.

# Trust

# Social value through ethical change

## Digital Ethics collection: Governance and Values

Focusing on the Principles for Public Sector Good Governance, public sector skills in the search for public value and how these relate to the wider social value agenda. As a basis for constructing supporting leadership approaches to compliment the digital ethics agenda.

[socitm.net/resource-hub/collections/digital-ethics/governance-and-values/](https://socitm.net/resource-hub/collections/digital-ethics/governance-and-values/)

[socitm.net/resource-hub/socitm-research/regeneration-through-ethical-change](https://socitm.net/resource-hub/socitm-research/regeneration-through-ethical-change)

# Championing digital, ethical practice

Developing tools and resources to help embed the five key principles of ethical practice – beneficence, non-maleficence, autonomy, justice and explicability – in support of people and their communities.

## Digital ethics briefings and guidance around:

- Ethical principles, frameworks and standards
- Ethical attributes – principles into ethical practice
- Ethical placemaking for people and communities
- Essential ethical resources
- Ethical professionalism – for leaders, policymakers and practitioners

# Resource hub

## Introduction from the authors

This collection is produced by William Barker (Socitm Associate Director) and Martin Ferguson (Socitm Director of Policy and Research).

[Introduction from the authors](#)

## Understanding digital ethics

- [Digital ethics in context](#)
- [Ethics by design](#)
- [Ethics of use](#)
- [Societal ethics](#)

## Ethical principles and core values

- [Emerging principles and common values](#)
- [Ethical framework for Smart Information Systems](#)
- [Ethics and data protection in Artificial Intelligence](#)
- [Place-based ethical challenge](#)

## Ethical leadership

- [Public standards and ethical practice](#)
- [Governance and values](#)
- [Professional ethics](#)
- [Ethical decision making](#)
- [Responsible use and design](#)

## Attributes of ethical practice

- [Non-maleficence: do no harm](#)
- [Beneficence: do good](#)
- [Autonomy: preserve human agency](#)
- [Justice: be fair](#)
- [Explicability: Operate transparently](#)

## Standards, guidance and tools

- [Emerging technical standards](#)
- [Emerging guidance](#)
- [Emerging tools](#)
- [Glossary](#)

# Core areas

- **Social value**
- **Digital leadership** (working with the Solace Code)
- **Digitalisation outcomes**
- **Connected places observatory**
- **'What works' modules** for:
  - Cyber resilience
  - Emerging technologies (AI and IoT, for example)
  - Harnessing and handling data (including GDPR reform – public sector algorithms)

# Today's agenda

If you have any feedback or comments you wish to make during today's sessions, please interact with us at [slido.com](https://www.slido.com) #SOCITM191022 or scan the following QR code with your smartphone camera or a QR code scanner app:

10:00	Welcome and introduction
10:10	Ethics – is it a risky business?
10:30	Workshop: Creating a brighter future
11:30	Evidence based decision-making to improve the lives of our residents
11:50	What part does the private sector play?
12:00	Networking lunch
13:00	Post-lunch recap
13:05	Collaborating for success
13:15	Why experience is the new battlefield for IT
13:45	Panel session: Ethical use of data
14:30	Networking break
15:00	The future for our children
15:30	Top Talent London 2022: New ways of working in a hybrid workplace delivering digital transformation with document solutions
16:15	Closing remarks
