Welcome to the Clamps & Couplers brochure from Duratruss – your trusted partner for professional rigging solutions. For decades, Duratruss has been recognized across the entertainment, events, and installation industries for delivering products that combine German engineering quality, uncompromising safety standards, and reliable performance.

In this edition, we focus on our extensive selection of clamps and couplers – essential components that ensure secure and flexible connections in every setup. Whether you are working on a live production, a fixed installation, or a touring application, Duratruss products are designed to integrate seamlessly, offering strength, durability, and ease of use.

Every clamp and coupler in this brochure reflects our commitment to certified quality, rigorous load testing, and compatibility with industry standards. Backed by responsive customer support and a continually growing product portfolio, Duratruss is dedicated to helping professionals achieve safe and efficient rigging every time.

Discover the range and see why riggers and installers across Europe and beyond rely on Duratruss. For further information, detailed specifications, and updates, visit www.duratruss.com

DT SPEAKER MOUNT 75KG

CODE: 1733000191

DT SPEAKER MOUNT 75KG BLACK

CODE: 1733000192

New Design Speaker Mounts

Duratruss introduces the next generation of speaker mounts, engineered for both strength and aesthetics. Available in aluminum (silver) and black finishes, each version is now fully color-coordinated – including the mount, clamps, and screws. While the silver model maintains its clean, classic look, the black version has been completely refined in full black for a seamless, professional appearance.

With a load capacity of up to 75 kg, these mounts combine durability, safety, and visual harmony, making them the perfect choice for any stage, installation, or event setup.

TÜV Certified Safety & Reliability

All Duratruss clamps are TÜV certified, underlining their compliance with strict international safety and quality standards. This independent certification assures users that every clamp has been rigorously tested for load capacity, durability, and secure performance. For professionals, it means total confidence when rigging truss and equipment – knowing that each component meets the highest level of reliability. With TÜV approval, Duratruss clamps stand for trust, safety, and peace of mind on every stage or installation.

Duratruss Stainless Steel Clamps (A2 & A4)

Engineered for demanding environments, our A2 and A4 stainless steel clamps combine strength, safety, and durability. Designed to resist corrosion, they are ideal for both indoor and outdoor applications – even in challenging conditions such as coastal or humid areas. With precise manufacturing and a secure grip, these clamps ensure reliable mounting of truss and accessories, giving professionals peace of mind on every project.

Designed for versatility and clean integration, the Duratruss Lighting Fixture Suspension allows fixtures to be mounted upside down on top of DT24 or DT34 truss towers. With discreet internal cable management, DMX and power wiring can be routed inside the aluminum frame for a professional and uncluttered look.

Compatible with most moving heads fitted with one or two Omega brackets (up to a fixture height of 560 mm, including bracket), this suspension is ideal for a wide variety of event and stage applications. Available in both silver and black, it blends seamlessly with your truss system for a uniform appearance.

Built from durable aluminum and rated for loads of up to 30 kg, the Duratruss Lighting Fixture Suspension combines strength, safety, and aesthetics in one smart solution.
