This motor is certified for hobby rocketry use in the configuration it was tested for the members of the Tripoli Rocketry Association and all approving organizations with reciprocal agreements.

Motor Manufacturer: RCS Rocket Motor Components, Inc.
Manufacturer's Designation: G73-7C, G73-11C, G73-15C (Enerjet 30)
Propellant: Classic Propellant™
TMT Nomenclature: G69 (128.64 N-Sec)

Diameter: 29mm (1.14")
Overall Length: 153mm (6.02")
Motor Hardware: Single-Use

Loaded Mass: Loaded Weight: 127g (0.27 lbs.)
Propellant Mass: 62g (0.13 lbs.)
Burnout Mass: 65g (0.14 lbs.)

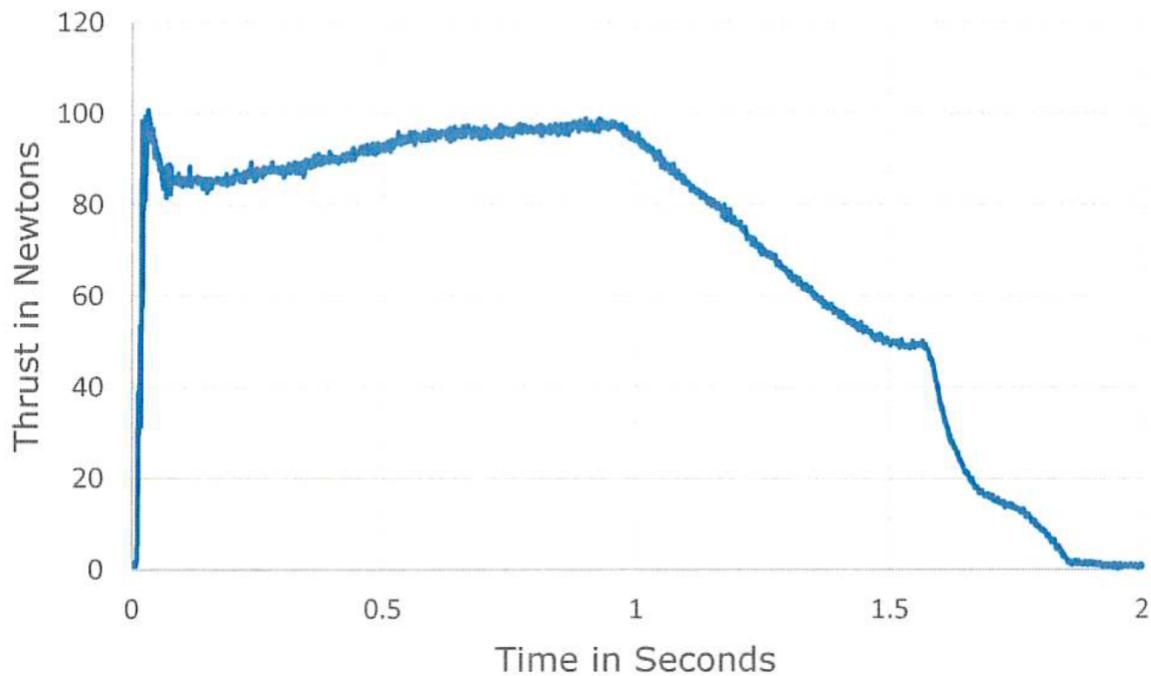

Burn Time: 1.85 Seconds
Total Impulse: 128.64 N-sec (28.91 lb.)
Max Impulse: 89.90 N-Sec (20.21 lb.)
Average Impulse: 69.32 N-sec (15.58 lb-sec.)

Delay Time Data: 7, 11, 15 Seconds

Case Temp: <77°C/171°F (NFPA 1125 7.4.1 200°C/392°F)

Number of Motors Tested: 11

Thrust-Time Curve:

Sincerely,

Art Hoag
