

Ductless Single Zone Heat Pump

HPG Series

Performance up to

Up to

Features

Operation mode

- Cooling, heating, dehumidifying, fan and auto.

Nominal capacity

- 9000, 12000, 18000, 24000 BTU/hr.

Voltage

- 115V, 230/208V, 60 Hz, 1-phase.

Indoor unit

- High wall installation, dual side connection.
- Plastic housing, standard white.
- Cross-flow fan with selectable speed from 3 operation modes.
- Evaporator fins covered with hydrophilic coating for improved corrosion resistance.
- Washable filters.

Outdoor uni

- Variable speed rotary compressor (INVERTER), with PCB control protection.
- Electronic expansion valve for precise control of refrigerant flow.
- Condenser fins covered with a hydrophilic coating for improved corrosion resistance.
- Quiet axial-flow fan.
- Multi-hole pan with smart heater to prevent ice formation.
- Compressor blanket and preheating technology.

Connection piping

- Minimum piping length of 10 ft. (3 m).
- Flared connections.

Control

- Wireless remote included.
- Temperature display format: °C or °F.

Warranty

 1-year basic warranty on parts and 5-year basic warranty on the compressor (labor not included).

Application

 Dining room-kitchen, living room, family room, commercial building, office building, condo, restaurant.

Features and functions

Smart Pan Heater

Prevents ice formation in the base pan of the outdoor unit.

Compressor Blanket and Preheating Technology

Keeps the oil inside the compressor warm and prevents it from mixing with the refrigerant.

Anti-Corrosion Fin Coating

Condenser and evaporator fins are covered with a hydrophilic coating for greater corrosion resistance – a clear advantage for people living in coastal regions.

Refrigerant Leakage Detection

The indoor unit will display "EC" when the outdoor unit detects refrigerant leakage.

Smart Defrosting

Provides greater comfort and energy savings by eliminating unnecessary defrost cycles.

Smart Preheating

The system delays turning on the fan in heating mode to avoid blowing cold air out at startup.

Auto Restart

In case of power failure, user selection and system parameters are stored in non-volatile memory. The system will automatically return to the last operating mode when power resumes.

Auto-Clean

Keeps the indoor unit dry to pevent mold growth.

Self-Diagnosis

A microcomputer monitors the system and turns the unit off if abnormal operation is encountered. An error code will be displayed on the indoor unit to facilitate maintenance.

Turbo Mode

The unit operates at super high speed to achieve quick cooling or heating.

Up & Down Swing

Can be used to select oscillating angles for the vertical louvres.

Timer

Allows you to program the time you want the unit to start and stop over a 24-hour period.

Sleep Mode

This function can be used to gradually increase or decrease room temperature.

Silence Function

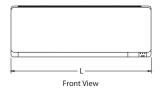

The unit will operate at low frequency and the fan at the lowest speed to reduce noise level.
