

General Product Safety Regulation (GPSR) – Safety Information for Bike Stickers

This document provides safety information for bike stickers to ensure compliance with the UK and EU General Product Safety Regulation (GPSR).

1. Intended Use

Bike stickers are designed solely for decorative or visibility purposes on bicycles. They are not intended to replace essential safety reflectors or lights.

2. Material Safety

Stickers are made from non-toxic, durable, and weather-resistant materials that comply with safety standards for consumer products.

3. Application and Removal

Ensure the surface of the bicycle is clean and dry before applying. Avoid placing stickers on moving parts, braking surfaces, or areas that could obstruct visibility. Remove carefully to avoid leaving adhesive residue.

4. Child Safety

Keep stickers and packaging away from young children under 3 years due to potential choking hazards from small parts.

5. Maintenance

Inspect stickers periodically. Replace if they show significant wear, peeling, or reduced visibility.

6. Disposal

Dispose of stickers responsibly. Follow local recycling and waste management guidelines for adhesive products.

7. Compliance Statement

These stickers are designed in accordance with the General Product Safety Regulation (GPSR) requirements to ensure they do not pose risks under normal or reasonably foreseeable use conditions.
