ME007 FR Window & Door Sealing Membrane +

Meet the next-generation sealing membrane designed to withstand the harshest construction environments and the most unpredictable weather conditions. ME007 from illbruck's new '+' range delivers enhanced durability, superior fire performance, and extreme weather resistance—giving you complete confidence in every project.

The Heavy-Duty Membrane Built for Extreme Performance
Stronger. Tougher. More Durable

B-s2, d0

W1+

WHY CHOOSE ME007 + ?

- **Heavy Duty Construction** - Engineered to endure construction site impacts, ensuring longevity and reliability.
- **Unmatched Watertightness & Weather Resistance** - Exceeds W1 standards, keeping structures protected by wind-driven rain and extreme weather.
- **Fire Safe & Certified Class B Performance** - Compliant with EN 13501-1, tested as a complete system for total assurance.

Available Now
Stronger. Smarter. Built for the Future

Reaction to Fire Class B System

Our products have been tested together as a system - replicating how they would be applied in the 'real world'. Giving you peace of mind.

When bonded to the structure with illbruck SP025 FR Membrane Adhesive, the combination of SP025, ME007 & AT140 Primer has Class B-s2, d0 Reaction to Fire according to EN 13501-1.
