

# Wraptite<sup>®</sup> Tape with Kingspan Kooltherm<sup>®</sup> K106 Cavity Board

## DESCRIPTION

### BBA-approved airtightness solution for Cavity wall systems

Wraptite<sup>®</sup> Tape is the recommended airtightness tape for use with Kingspan Kooltherm<sup>®</sup> K106 Cavity Board installations. When used together, Wraptite Tape and Kooltherm K106 provide a solution for achieving an airtight yet vapour-permeable cavity wall system.

The use of a 100mm wide self-adhesive breathable tape is recognised within the BBA certification for Kooltherm K106, supporting compliance with airtightness and moisture management requirements.

## WHY CHOOSE WRAPTITE TAPE?

- Recommended by Kingspan Insulation
- BBA Certified 15/5274 - independently verified for performance
- Part of Kingspan K106 system - also covered under the system's BBA certificate 16/5299
- Airtight and Vapour Permeable
- Self-adhered - no primer or fixings required
- Maintains adhesion and airtightness performance across the life of the building

## APPLICATIONS

- Sealing joints between Kooltherm K106 cavity boards
- Detailing around windows, doors and service penetrations
- Creating a continuous airtight layer within cavity wall constructions
