## Aurecon Indonesia Chooses SuperSurf

## CONSULTING COMPANY AURECON INDONESIA CHOOSES SUPERSURF

The global GIS software and geospatial solutions provider- **Supergeo** is pleased to announce that the consulting company **PT Aurecon Indonesia** selected **SuperSurf** to collect spatial data for their projects. Founded in 1997, PT Aurecon Indonesia is an engineering consulting company located in Jakarta, which is a subsidiary of the international consulting group Aurecon. Since its establishment, Aurecon Indonesia has focused on providing professional consultancy services in areas like infrastructure, port

facilities, and power stations. Collecting comprehensive spatial data is essential for engineering consulting firms like Aurecon, because it would help the planners to estimate the cost precisely and make plans appropriately. Compared to general mobile GIS software, SuperSurf has more features that can help fieldworkers to collect data more efficiently, including the support for WMS and WMTS standards, NTRIP solution, and data synchronization with SuperGIS Server. ### PTV GROUP BOOSTS FOOTPRINT IN CHINA

In keeping with the motto "Think globally, act locally", the software provider **PTV Group, Karlsruhe**, is further expanding its international business in the transport and logistics sectors. A new Managing Director has now taken over responsibility for the local branch office in **Shanghai, China**. With his experience in all facets of transportation, **Oscar Jiang Jing** will boost the German corporate group's business in the growth market China significantly. In addition to the existing office in Shanghai, another two regional offices will be established in Beijing and Chengdu within the next three years, ensuring greater proximity to customers. Currently, there is targeted investment in the trend topic mobility, with future-oriented solutions for optimising transport and logistics, and China is working intensively on the electrification of transport. The challenges in China are many and varied. At the same time, the opportunities will be as vast as the country itself. [www.ptvgroup.com](http://www.ptvgroup.com)

### IT'S LIFT OFF! - WORK ON HONG KONG'S THIRD RUNWAY GETS UNDERWAY

**Hong Kong International Airport**, one of the world's busiest airports, built in the late 1990s on reclaimed land, is expanding to include a third runway. In preparation for this expansion, the Airport Authority selected **Fugro** to carry out the necessary site characterisation investigations. Fugro has been closely involved with this significant project from the beginning, and has gained detailed knowledge of the local geology from its previous work experience at the existing airport and associated infrastructure. As the expansion requires further reclamation of land, Hong Kong's Airport Authority had specific objectives for the site investigation of the expansion. These were to understand the geological profile of the area, and to trial a proposed deep cement mixing technique to minimise the amount of dredging required, thus reducing the local environmental impact during the construction phase. ### TERRA DRONE ESTABLISH NEW BRANCH IN BRISBANE, AUSTRALIA.

A major Japanese start-up **Terra Drone**, has chosen Queensland for its regional office after being inspired by the Palaszczuk Government's drive to advance innovation and entrepreneurship across the state.

**Deputy Premier and Minister for Trade and Investment Jackie Trad** said "Terra Drone, Japan's leading unmanned aerial vehicle (UAV) provider, made the decision to come to Brisbane as a result of the Premier's trade mission to Japan in November 2016. "Terra Drone were really excited about the Palaszczuk Government's focus on innovation and decided that Queensland was the ideal place for a base in the Asia Pacific region," Terra Drone will be setting up in Brisbane's River City Labs innovation precinct and will be looking to build on their already productive relationships with local businesses and academics. **CEO Toru Tokushige** said "After visiting numerous countries, Terra Drone Corporation is very happy to select Queensland," [www.terra-drone.net](http://www.terra-drone.net)
