DUNLOP AIR ASSIST SUPPORT APP !!

Dunlop OPTION.4.BOS Bluetooth Control for Air Suspension.

Make your ride even more comfortable and efficient with the OPTION.4.BOS Bluetooth control for air suspension. With Dunlop's Bluetooth control system, you have full control over your vehicle's air suspension. This advanced technology allows you to easily adjust height settings via your smartphone or tablet. Perfect for those looking for a combination of convenience, comfort, and precision.

What is the Dunlop OPTION.4.BOS Bluetooth Control for Air Suspension?

The OPTION.4.BOS is an innovative solution that wirelessly controls your vehicle's air suspension. Using Bluetooth, you can quickly adjust the vehicle height to match driving conditions, ensuring the optimal driving experience at all times, no matter the terrain or load.

Benefits of the Dunlop OPTION.4.BOS Bluetooth Control for Air Suspension:

Control your air suspension system with the **Dunlop Air Assist Support App** from your smartphone or tablet.

- Safety: Automatic height adjustment when not connected to the app.
- Easily set custom height presets adjusted to your vehicle.
- Use presets for: Lift-, Minimum-, Maximum-, Park-, and Drive height.
- Manually set the desired pressure using precise controls for quick adjustments.
- Enable child lock to prevent unintended use of the **Dunlop Air Assist Support App**.
- Register up to 25 users per vehicle with a unique registration code.
- Receive instant notifications on your screen in case of air pressure loss.
- Keep your system up-to-date easily with updates, no dealer visit required.
- Control your air suspension from your smartphone or tablet, even when outside the vehicle.
- Simple installation with no need for a physical control panel.
- The **Dunlop Air Assist Support App** is designed with simplicity and ease of use in mind.

Why Choose Dunlop?

Dunlop is a globally recognized brand with industry-leading products. With decades of experience and a strong focus on quality, we offer reliable and advanced solutions for all your suspension needs. The Dunlop OPTION.4.BOS Bluetooth control for air suspension is designed to elevate your driving experience with ultimate comfort and ease of use.

Enhance your driving experience with the Dunlop OPTION.4.BOS Bluetooth Control for Air Suspension! Whether you're going on long trips, off-road adventures, or driving daily, the OPTION.4.BOS Bluetooth control ensures the perfect air suspension setup, so you're always on the road with confidence and comfort.
