

Documento 86-3303-2015 rev. I

Camozzi Technopolymers Srl places among its priority objectives the quality of the product and service, safety at work, environmental protection, compatibility of its activities with the territorial context in which it operates as defined in detail in the Group's Sustainability Report.

The Company Management is therefore committed to implementing and making available to anyone who requests it, its Quality Policy:

QUALITY

- Understand the explicit and implicit needs of customers
- to create a reliable and technologically advanced product, aligned with the best competition and compliance with mandatory requirements (where applicable), offering an efficient and effective service
- meet the customer's expectations
- Aim for the satisfaction of the organization's staff
- research and implement actions aimed at continuous improvement, following the "Lean" principles
- Enrich the skills of the organization by identifying new areas of development in the areas in which it operates by offering support to customers in the sector
- Implement and maintain an effective Quality Management System according to the requirements of the UNI EN ISO 9001:2015 standard, systematically updating and applying the defined procedures and prescriptive documents as an aid provided to the organization; extend the Quality Management System to the additional requirements of the Medical sector in accordance with the UNI EN ISO 13485 standard where defined by the organization
- Define the weighted, achievable objectives consistent with the Camozzi Group's strategies, identifying and managing related risks and opportunities with a risk-based thinking approach
- Periodically evaluate the performance of Company Management through the tools of the Quality System, update and redefine the Quality Policy with new objectives in relation to the results obtained;
- Analyze the causes of non-compliance as a starting point for the definition of appropriate corrective and preventive actions to be taken
- CAMOZZI Technopolymers is committed to keeping its CFP Systematic Approach updated and periodically verified. The Company's desire is, in fact, to implement an effective and efficient management system, capable of producing LCA studies, technically aligned with recognized international standards (ISO 14040, ISO 14044, ISO 14067); this will allow information on the carbon footprint of specific products to be published, which can be placed on the market with specific amounts of CO2eq.
