

Vulcan Combi Ovens

Vulcan Sapiens Reloaded

Product Features:

- Sapiens is the oven for assisted cooking with electronically managed manual controls
- It is equipped with Vulcan automatic programs, 95 cooking programs already in its memory and can contain up to 99 cooking programs saved by the user, each of which can have up to 4 cycles in automatic sequence
- It naturally allows manual cooking, with the ability to set up to 4 cycles in automatic sequence and core temperature control cooking using the option multi-point or needle probe
- With the Ecospeed function, by recognising the quantity and type of product being cooked, Sapiens optimises and controls the delivery of energy and maintains the correct cooking temperature, preventing any fluctuations
- The new GFT (Green Fine Tuning) burner modulation system and the patented high efficiency exchanger prevent power waste and reduce harmful emissions (-10% energy)
- Sapiens recognises the level of steam and only uses the amount of energy required. With the EcoVapor system, there is a definite reduction in water and energy consumption thanks to automatic control of the steam saturation in the cooking chamber
- The patented Fast Dry® system (active cooking chamber dehumidification system) ensures perfect crispiness and browning of fried foods, grilled foods, desserts and bread, even at full loads it uses 100% of the load capacity
- The Autoclima® system automatically controls the perfect climate in the cooking chamber
- The temperature and humidity are automatically controlled at the ideal levels according to the food to be cooked. Juiciness and tenderness are also ensured when warming pre-cooked foods

An ISO 9001:2015
Accredited Company
