

ADVANCED IMPLANT PRACTICE

LIVE SURGERIES ON PATIENTS

Sao Leopoldo Mandic, Brazil
29 November - 05 December 2026

- ✓ Intensive 5-day surgical course
- ✓ 100% hands-on with real patients

Training at Brazil's #1 Higher Education Institution in Health Sciences

32 ACADEMY

COURSE **OVERVIEW**

The Advanced Implant Practice program is an exclusive 5-day intensive 100% hands-on surgical implantology training designed for clinicians who want to advance their skills through real clinical experience.

Unlike conventional implant courses that rely primarily on models, simulations, or observation, this program places you at the center of real clinical practice. Under the supervision of experienced implant surgeons, you will actively perform implant procedures on real patients while receiving continuous guidance and immediate feedback.

Throughout these five intensive days, you will develop greater confidence in diagnosis, treatment planning, surgical execution, and intraoperative decision-making. Every clinical case presents unique challenges, allowing you to strengthen your judgment while refining the techniques that can be directly implemented in your daily practice.

With a small group of participants, the program guarantees an exceptional instructor-to-participant ratio, ensuring personalized mentoring.

The course is limited to
a maximum of **16 participants**
and will be conducted in **English**.

32ACADEMY

SÃO LEOPOLDO MANDIC

The Advanced Implant Practice program is hosted by São Leopoldo Mandic, Brazil's leading private institution for higher education in the health sciences and one of Latin America's most respected centers for dental education.

The program takes place inside a modern university clinic equipped with advanced surgical facilities, digital technologies, and dedicated teaching environments specifically designed for advanced clinical education, a destination for dentists from around the world seeking high-quality postgraduate training.

During the course, participants benefit from direct supervision by experienced implantologists and university lecturers who combine extensive academic knowledge with years of expertise and clinical practice, under the coordination of the program director Prof. Fernando Meres Morelli.

São Leopoldo Mandic has built an international reputation through academic excellence, clinical innovation, and research in dentistry. For 30 years, it has consistently ranked among Brazil's top 10 higher education institutions according to the Brazilian Ministry of Education.

Training in this environment allows participants to experience internationally recognized educational standards while working with real patients in a safe, structured, and highly supervised clinical setting.

PROGRAM COORDINATOR

Prof. Dr. Fernando Mendes Morelli

PhD in Implantology · Specialist in Implantology · Oral & Maxillofacial Surgery

With more than two decades of experience in implantology, Prof. Dr. Fernando Mendes Morelli brings extensive clinical expertise and academic leadership to the program, making him a leading reference for advanced implantology training in Brazil, with international recognition.

- Prof. Dr. Fernando Mendes Morelli has been working in Implantology since 1999 and holds a Master's degree and PhD in Implantology.
- Since 2013, he has coordinated Implantology specialization programs at several São Leopoldo Mandic units and is a member of the clinical staff in Oral and Maxillofacial Surgery at Vera Cruz Hospital in Campinas.
- He also coordinates the Immersion Course in All-on-Four Protocols with Immediate Loading at São Leopoldo Mandic.

32ACADEMY

MEET THE FACULTY

Under the coordination of Prof. Dr. Fernando Mendes Morelli, you will learn from a highly experienced faculty team, gaining practical insights and guidance from experts in implantology, surgery, prosthetics, and oral rehabilitation.

- **Dr. José Guilherme Soragi Pagotto**: graduated in Dentistry from PUCCAMP in 1999, he is a specialist in Stomatology and Dental Prosthetics. He has been an Assistant Professor at São Leopoldo Mandic, Campinas, contributing to the advanced academic training of dental professionals.
- **Dr. Fernando Henrique Bomtorin**: Dental Surgeon with more than 20 years of clinical experience, specialized in Implant Dentistry. Extensive expertise in complex oral rehabilitation, oral surgery, and implant supported prosthetics, skilled in digital treatment planning, bone grafting procedures, single-tooth implants, and full-arch rehabilitation protocols. Assistant Professor at São Leopoldo Mandic.
- **Regiane Arraes Amado**: holds a Master's Degree in Implant Dentistry, is specialized in Implant Dentistry and Periodontal Plastic Surgery and she has extensive academic experience as an Assistant Professor in Implant Dentistry and Advanced Surgery programs at São Leopoldo Mandic, working alongside leading specialists in the field.
- **Dr. Luciano Andriani de Souza**: dentist, professor, and academic and clinical manager with 28 years of professional experience, combining clinical practice, postgraduate education, and multidisciplinary team leadership. He holds a Master's Degree in Dentistry from São Leopoldo Mandic and a specialization from UNICAMP, with extensive experience in training and mentoring dental professionals at the postgraduate level.

32ACADEMY

- Practice, develop and master bone augmentation techniques.
- Advance and refine your approach in sinus lift procedures.
- Perfect your soft tissue management skills.
- Gain the confidence to successfully manage complex implant cases.
- Improve aesthetics, achieve predictability and long-term implant stability.

32ACADEMY

WHY THIS COURSE *IS* DIFFERENT?

Confidence and mastery are built through repetition and real clinical experience

Every patient who sits in your chair places something invaluable in your hands: their hope and trust. They trust your diagnosis, your judgment, and your ability to deliver the best possible outcome.

Unlike conventional implant courses, this program offers the rare opportunity to learn where it matters most: in real clinical situations, treating real patients under the guidance of experienced implantologists.

Every implant you place, every clinical decision you make, and every challenge you overcome becomes another step toward greater confidence, precision, and mastery in implantology.

Give your patients the trust that they are in the hands of the best clinician.

32ACADEMY

FOCUS ON YOUR *LEARNING*

From the moment you land in Brazil until the end of the educational program, details are planned to provide you a seamless educational experience. Our goal is simple: you dedicate your full attention to developing your implantology skills. We take care of the logistics and we ensure that you also experience memorable moments in Brazil that you'll take home and remember after the course has ended.

32ACADEMY

32ACADEMY

A JOURNEY YOU'LL NEVER FORGET, *IN BRAZIL*

Beyond the university clinic, you'll discover the vibrant culture of Rio Grande do Sul, a region where Brazilian hospitality, rich traditions, and exceptional gastronomy create an unforgettable setting for your learning experience.

Home to the world-famous Brazilian churrasco, charming architecture, and a thriving culinary scene, São Leopoldo offers the perfect opportunity to unwind after each day of intensive clinical training. Throughout your stay, you'll enjoy authentic local amazing experiences, connect with fellow clinicians from around the world, and build professional relationships that often last well beyond the course itself.

More than an implantology program, this is an opportunity to immerse yourself in a new culture, broaden your international network, and return home with not only advanced surgical skills, but also memories and experiences that will stay with you for a lifetime.
