

Key surgical and prosthetic considerations for soft tissue management in Immediate & Delayed implantology

Dr. Iñaki Gamborena

Key surgical and prosthetic considerations for soft tissue management in Immediate & Delayed implantology

by Dr. Iñaki Gamborena

The Course:

Thanks to these **2 Video Surgical Lectures**, performed during the residential course in his clinic in San Sebastian, and a step by step commentary by the Author, you'll be able to learn with Iñaki Gamborena and master single tooth implant supported restoration best practices.

The course focuses on peri-implant soft tissue esthetics optimization around the final restorations – critical element for achieving gingival integration and esthetic success.

In these 2 surgical full footages there will be a comparison of soft and hard tissue management techniques in immediate and delayed implant placement.

The step by step commentary will describe both treatment alternatives from a clinical perspective, critically highlighting their respective traits in concept and management.

The different points of view offered by the images of these two high definition recordings, allow you to be at the side of a world-renowned expert, to learn directly from his practice and reflect both in a prosthetic and surgical way, on immediate and deferred implant loading.

In this video course you will learn:

- the art of compensating resorption in immediate implant placement into fresh extraction sockets: from diagnostic to detail execution
- controlling soft tissue volume and scalloping in delayed implant placement
- how to exploit connective tissue graft taken from the tuberosity as volume maintainer
- soft tissue harvesting techniques
- flap design, suture selection and techniques

Format:

- 2 complete video surgeries, recorded in Dr. Gamborena's Clinic with step by step commentary
- presentation of the clinical case
- presentation of the post-op results
- discussion of the showed surgical approaches

SUBSCRIPTION TERM: *UNLIMITED*

Lectures: 2

Video: FULL HD VIDEO

Language: English

Video Lectures:**Lecture 1: Immediate single tooth implant placement in the esthetic zone**

"The art of compensating resorption": how to successfully integrate the final implant restoration into an inconspicuous restoration; everything you need to know about immediate implant placement into fresh extraction sockets: from diagnostics to detail execution.

This surgical lectures focuses on:

- tooth extraction + immediate implant placement in 22 + CTG and pontic in 23 + provisional abutment and crown
- provisional restoration on tooth
- the importance of provisional in defining the tooth diameter/locate margin
- planning the incisal implant placement
- transfer the provisional interface and customized abutment
- CTG below the finishing line

Lecture 2: Delayed single tooth implant placement in the posterior zone

“Controlling the soft tissue volumes & scalloping”, thanks to the role of volume maintainer provided by soft tissue graft taken from the tuberosity, Dr. Iñaki Gamborena will give an insight about all you need to know in delayed implant placement in the posterior area.

This surgical lectures focuses on:

- delayed implant placement in 15 + slim abutment + CTG
- first surgically design healing abutment
- maximize space for soft tissue grafting and tuberosity evaluation
- maximize CTG crestally
- reach excellent primary flap closure
- improve the papillary area

Dr. Iñaki Gamborena

Degree in Dentistry, U.O.D. 1989. 1989-90 Certificate in Occlusal and Temporo-mandibular disorders. Mexican Association of Occlusal Reconstruction (Mexican Association of Occlusal Reconstruction), Mexico City. 1990-92 Certificate in Autonomous Restoration Dentistry of Nuevo León University, Monterrey, Mexico. 1993-96 Certificate in Prostodontics & Master of Science in Dentistry. University of Washington, Seattle WA - USA. 1993-96 Winner of the "Bolender Contest Award" for Academic and Clinical Excellence. Associate Professor at the University of Washington Dental School since 2001. Associate Professor (Clinical Associate Professor) at the Medical College of Georgia, Faculty of Dentistry. Active member of the European Academy of Aesthetic Dentistry (European Academy of Esthetic Dentistry, E.A.E.D.). International KOL and speaker at continuing education courses worldwide.
