What Happened Around the School This Week

In cooperation with the Ministry of Interior, ISME organized a Drug Awareness Session aimed at educating students about the risks and harmful effects of drug use. The session encouraged students to make informed and responsible choices, understand the importance of prevention, and recognize the role they play in protecting their health and well-being. This collaboration reflects our commitment to promoting awareness, responsibility, and a safe school community.

DRUG AWARENESS SESSION

Students were encouraged to understand the value of personal responsibility, healthy decision-making, and seeking support when needed.

The session also reinforced the important role that awareness and prevention play in protecting young people and contributing to a safe, healthy, and responsible community.

Mathematics Olympiad Diagnostic Test

Our students proudly participated in the Mathematics Olympiad Diagnostic Test organized by the Ministry of Education and Higher Education, an opportunity designed to identify and support talented students with strong mathematical abilities. Through challenging problems requiring logical reasoning, critical thinking, and problem-solving skills, students had the opportunity to demonstrate their abilities beyond the traditional classroom setting. We are proud of their enthusiasm and commitment and look forward to supporting them as they continue to develop their mathematical talents and pursue future opportunities in academic competitions.

We are proud to recognize Al Maha Al Thani, Yousef Al Marwani, Hamza Al Tanani, Abdulrahman Al Sulaiti, Sara El Shikh Khaled and Sara Al Abdalla for representing ISME in the Mathematics Olympiad Diagnostic Test for the 2026–2027 academic year.

ISME X Feed a Friend

FEED A FRIEND

Together for Good

Books For Good

Give your preloved books a second life and help provide educational resources for children out of school.

100% of proceeds go directly towards supporting the Little Learners Project.

GOT BOOKS TO SPARE?

**Finished reading?
Pass it on for Good**

Your preloved books will be sold to purchase learning resources and stationery for our Little Learners, helping more children learn, grow, and thrive.

Preloved, not well-worn — no writing, drawings, or ripped pages please! We accept books in English & Arabic, and fiction books only (no text books).

**Drop off books all next week:
27 – 30 September**
(Monday – Thursday)

**Drop off point:
Assembly Hall**

@feed.a.friend @togetherforgoodevents

ISME is pleased to collaborate with Feed a Friend on the Books for Good Book Drive, supporting the Little Learners Project. From September 27–30, our school community is invited to donate preloved English and Arabic fiction books in good condition. Donated books will be given a second life, with 100% of the proceeds going toward purchasing learning resources and stationery for children facing financial difficulty. Through this meaningful initiative, a book you have already enjoyed can become an opportunity for another child to learn, grow, and thrive.

Hands-On Learning in Action: Engineering & Health Science

Our Engineering and Health Science students were busy putting learning into action this week! Engineering students explored breadboards and Arduino circuits, designing and testing their own systems using LEDs, sensors, and other components. Meanwhile, Health Science students brought complex scientific concepts to life through hands-on models exploring GI motility, endocrine hormone-receptor interactions, and drug interactions. These engaging experiences encouraged students to experiment, problem-solve, make connections, and apply classroom knowledge to real-world STEM and healthcare contexts.
